

# Subject Index to Volume 253

## A

Abdomen, subdiaphragmatic vagotomy, retrograde tracer technique for, R361  
 Abdominal viscera, afferents, hypoxia, bradykinin, and prostaglandin effects, H556

Acclimation: see Temperature, and the specific environmental condition

### A6 cells

apical membrane determinants, heterogeneity of expression of, C37  
 potassium and sodium selectivity, time-dependent apical membrane, C1

4-Acetamido-4'-isothiocyanostilbene-2,2'-disulfonic acid  
 chloride activity measurement, microelectrodes, C343

sodium bicarbonate cotransport, basolateral membrane, proximal tubule (mud puppy), F340

Acetate, ion transport and, cecum, G171  
 Acetoacetate, malformations, embryo, E72  
 Acetylcholine

$\beta$ -adrenoceptors, cAMP-generating system and, colon, G378

arterial dilation, endothelial cell-mediated, H1325

comparison with corticotropin-releasing factor, catecholamine secretion and, R209

dilation of preglomerular vessels, hydro-nephrotic kidney, F1157

endothelium-dependent responses, cerebral arterioles, chronic hypertension, H1435

muscarinic cholinergic inhibition, airway smooth muscle, C97

muscarinic potassium currents and, atrial cells (guinea pig), H210

nicotinic sensitivity, vagotomy and, H394

postpacing tachycardia and, H333

release, stimulus train, atrial fibrillation threshold and, H863

sweat secretion, VIP-induced (monkey), R935

vasodilation, intracerebral arterioles, H1253

Acetylsalicylic acid, circadian rhythms, body temperature in, R306

### Acid

secretion, colon (guinea pig), G155  
 titration, alkalinity measurement of cellular net acid-base fluxes, C525

### Acid-base balance

alkalinity data and, F197

glutamine flow, interorgan, F1069

carbonic anhydrase, bicarbonate transfer and (shark), R450

cellular, stomach, fluorescence microscopy, C30

electrolytes and, red blood cells and plasma, submersion (turtle), R64

fluxes, method of measurement, C525

intracellular, astrocytes, cortical stimulation and, R666

regulation, kidney collecting duct, F213

systemic, ileal secretion and, G330

urinary buffer excretion, ammonia, F595

### Acidification

bicarbonate transport, proximal convoluted tubule, F912

chronic metabolic alkalosis, proximal convoluted tubules, F89

differentiated transport function, collecting ducts, F1302

micropuncture study, renal proximal tubule (starling), R587

### urinary

bicarbonate transport, collecting tubules (salamander), F310

disequilibrium pH, cortical collecting tubules, F1232

hydrogen-ATPase, adrenalectomy effects, F495

hydrogen current transients (toad), F606

### Acidosis

carbonic anhydrase, bicarbonate transfer and (shark), R450

changes, calcium fluxes and contractile state during, heart cells (chick), C137

ileal secretion and, G330

inotropic effect of catecholamines and, heart, newborn, H1441

insulin and, proximal tubular segments, F1171

intracellular, influence on contractile function, working heart, H1499

### lactic

red blood cells and plasma, submersion (turtle), R64

type A hypoxic, E271

### metabolic

interorgan glutamine flow, F1069

myocardial response to, H1261

proton-induced calcium release, bone, F998

recovery from, F1308

sodium-hydrogen antiporter in posthypocapnia, F833

### respiratory

intercalated cells, cortical collecting duct, F1142

phosphaturia of hypercapnia, F34

sodium-hydrogen antiporter in posthypocapnia, F833

substrate utilization in, kidney, F351

Acivicin, biliary excretion of thiols and, G86

Acridine orange, intercalated cell function, maturation of, renal, F622

ACTH: see Adrenocorticotropin

### Actin

synthesis, recovery of atrophied muscle and, C205

tight junction permeability, intestinal, C171

Actin filament, disruption of, aortic smooth muscle cells, C71

Adenine, metabolism, myocardial, norepinephrine infusion (guinea pig), H1184

Adenine nucleotides

hypoxic cell death, liver, G390

metabolism, slow-twitch red muscle, C426

### Adenosine

coronary vasodilator reserve and, during tachycardia (pig), H422

metabolism, atrioventricular node, adult and neonate, H1192

NAD dynamics and, cortical nephron segments, F269

neuroadrenergic neurotransmission, spontaneous hypertension, H909

phosphocreatine absence and, luteal cells, E391

plasma infusion, complement-activated (swine), H58

regulation, cerebral blood flow, H165

release, phosphorylation potentials and, during norepinephrine infusion, heart (guinea pig), H1184

Adenosine monophosphate, energy metabolism, exercise effects, skeletal muscle, C316

Adenosine monophosphate, cyclic

accumulation, dopaminergic stimulation of, mesangial cells, H358

anion exchange, gallbladder epithelium (mudpuppy), C79

cellular mechanisms and, enteric endocrine cells, G684

chloride secretion and, tracheal epithelium, C828

cholinergic transmission mediated by, somatostatin effects, myenteric plexus, G607

cytoplasmic free calcium and, alveolar type II endothelial cells, C679

epoxides, vasopressin and, bladder (toad), F464

fluid secretion mediated by, Malpighian tubules (mosquito), R701

generating system,  $\beta$ -adrenoceptors and, colon, G378

gonadotropin secretion and

pituitary gland, female, E290

pituitary gland, male, E296

granulosa cells, adhesion and differentiation, C625

hypothyroidism, cellular action of vasopressin, F104

improved separation method, kidney tubules, F358

$N^{\alpha},2'$ -O-dibutyl-, calcium levels and, osteoblastlike cells, E45

noradrenergic stimulation of mitochondrialogenesis, brown adipocytes, C889

polypeptide vasodilation and, vascular smooth muscle, H1074

potassium secretion and, nasal salt glands (lizard), R83

protein phosphorylation and colonic epithelial cell line, G420

parietal cells, G823

protein secretion and, parotid gland, C774

PTH and, phosphate transport, kidney, E221

purine synthesis and, liver, E684

somatostatin effects, pancreatic acinar membranes, G308

water permeability and, bladder (toad), F120

Adenosine monophosphate deaminase, ATP depletion, slow-twitch red muscle, C426

Adenosine triphosphatase

calcium transport, bladder (turtle), R917

muscle fibers, diaphragm, C210

myofibrillar, diabetes and, skeletal muscle, E395

- Adenosine triphosphatase (*continued*)  
sodium-potassium-activated, collecting tubule cell response to, F8
- Adenosine triphosphate  
action potential duration and, ventricular muscle, during energy block, H373  
anaerobic, turnover, fast-twitch muscle (trout), R186  
cardiac tissue, anaerobic conditions (trout), R838  
cytosolic free calcium and, parotid acini, G290  
depletion, slow-twitch red muscle, C426  
energy metabolism, exercise effects, skeletal muscle, C316  
hydrolysis, myocardial response to acidosis and, H1261  
metabolic inhibition, cardiac cell injury, C700  
oxygen metabolite-mediated injury and, kidney, F692  
phosphocreatine absence and, luteal cells, E391  
preservation by inosine, during ischemia, H1224  
transmural anoxic wave front, early ischemia, H240
- Adenylate cyclase  
adrenergic receptors, proximal tubules, F848  
aging effects, liver, E277  
hypothyroidism, cellular action of vasopressin, F104  
modulation of activity, during sucrose feeding, food deprivation, and cold exposure, E629  
muscarinic cholinergic inhibition of, airway smooth muscle, C97  
potassium depletion effects, collecting tubule, F408  
renal cortical, cadmium effects, F401  
somatostatin effects, pancreatic acinar membranes, G308
- ADH: *see* Antidiuretic hormone
- Adipocytes  
blood flow: *see* Blood flow  
brown  
mechanisms of respiratory control (hamster), C301  
noradrenergic stimulation of mitochondriogenesis, C889  
hyperplasia  
protection in hibernators (dormouse), R580  
resistance in high-fat diets (squirrel), R576  
insulin action, physical training and, E489  
insulin passage, capillary endothelium, E475  
lactate production from glucose, food restriction effects, E336  
lipolysis and, adaptation in exercise, E383  
white, fluorescence of mitochondrial clusters, C783
- Adipose tissue  
blood flow: *see* Blood flow  
brown: *see* Brown fat  
capillary endothelium, restricted passage of insulin across, E475  
de novo lipogenesis, carbohydrate intake effects, E664  
insulin action, physical training and, E489
- intercellular water space, microdialysis method, E228
- white  
insulin and cold exposure effects, E179  
sensory innervation, R942  
white fat cells, fluorescence of mitochondrial clusters, C783
- Adrenalectomy  
catecholamine and cortisol responses, experimental cardiac arrest, E283  
catecholamine levels, DOCA-salt hypertension, erythrocytes, H270  
compensatory lung growth and, E343  
cortical collecting duct after, F742  
hemorrhage and, vasopressin and enkephalin release, R467  
high-fat diet and, brown fat metabolism with, E149  
hydrogen-ATPase and, nephron, F495  
intestinal growth and, artificially reared pups, G802  
plasma potassium, diurnal cycle potassium and, F1178
- Adrenal gland  
sensitivity, plasma sodium, awake state, R832  
vasculature, corticotropin-releasing factor role in, R209
- Adrenal glomerulosa, cyclosporin effects, H1596
- Adrenal hormones  
control of compensatory growth by, lung, E343  
postpneumectomy, lung growth and, E6  
rhythms, long and short days, male (hamster), R321
- Adrenal medulla  
catecholamine secretion, corticotropin-releasing factor role in, R209  
exercise, muscle glycogenolysis, insulin effects, R535  
regulation of adrenergic receptors, renal cortical, F1063
- Adrenal nerve, activity, hypothalamic stimulation and lesion effects, R418
- Adrenergic agents, ADH action and, pertussis toxin effects, cortical collecting tubules, C105
- Adrenergic agonists  
mechanisms buffering, baroreflex, awake state, H728  
vascular reactivity to, Goldblatt hypertension, H1523
- Adrenergic control, lipolysis, adaptation in exercise, E383
- Adrenergic nerve, stimulation, carotid artery response to, endothelium inhibition of, H792
- Adrenergic responses, modulation, flow and, H1112
- Adrenergic stimulation, mitochondriogenesis, brown adipocytes, C889
- Adrenoceptors: *see* Receptors
- Adrenocorticoids, glutamine flow, metabolic acidosis, F1069
- Adrenocorticotropin  
concentration, cation homeostasis relations (bird), R20  
hormones and substrates, during neuromuscular blockade, R687  
stress and, colon, G582
- Aequorin  
calcium signals, vascular muscle cells (ferret), H1456
- contractions induced by, intracellular calcium levels in, aorta, H1365  
measurement of calcium concentration, tracheal smooth muscle (calf), C817
- Aerobic recovery, time course, papillary muscle, H325
- Afferent nerves  
primary depolarization, central interactions, H1127  
pulmonary vagal, control of discharge patterns in medullary respiratory neurons, R809  
sympathetic, cardiovascular attenuation of baroreceptor mechanisms, H787
- vagal  
ANP reflex control of, H1136  
low-salt diet and, H133  
prostacyclin and preload, awake state, H1477  
renal nerve activity mediated through, vasopressin and, H1  
stimulation, cerebroventricular kinins and, R137
- visceral  
hypoxia, bradykinin, and prostaglandin effects, H556  
neural, hemodynamic, and renal responses to stimulation, H1167
- Afterdepolarizations, catecholamine-induced, reduction of sodium concentrations and, H115
- Afterload: *see also* Loading; Preload  
ANF release, heart-lung preparations, H1044
- Aging  
adenylate cyclase and, hepatic, E277  
adrenergic vasoconstrictor responses and, hindlimb, H1566  
biliary excretion and, thiols, G86  
brachial arterial changes, wrist occlusion, hypertensive men, H217  
food intake, neuropeptide Y effects, R516  
ionophore A23187 and, LH hyposecretion from pituitary cells and, E233  
kidney membrane permeability and, water and solutes, R8  
modulation of heart rate, H874  
postnatal, luminal digestion of lactoferrin, G397  
red cell, potassium transport, *N*-ethylmaleimide-induced, C7  
renal function, awake state, R555
- Airway  
smooth muscle, adenylate cyclase in, muscarinic cholinergic inhibition, C97  
smooth muscle cells, histamine-induced calcium release, C561
- Alanine  
chlorpromazine effects, hepatocytes, G613  
glucose infusion and, urea production, E543  
infusion, sample site selection for tracer studies, E173
- Albumin  
concentration, endothelial albumin transport and, H654  
<sup>125</sup>I-labeled, space, pressure and intimal damage effects, aorta, H1530  
solvent drag reflection coefficient, integral-mass balance method, H194  
Albuminuria, modulation, dietary protein

and converting enzyme inhibition, F719

Alcohol, gastric damage and, G1

Aldosterone  
chloride, correction of alkalosis, F1031  
concentration, cation homeostasis and (bird), R20  
head-out water immersion, cardiac nerve response, awake state, R242  
kaliuretic regulatory factors, F1182  
plasma concentration, Goldblatt hypertension, H1623  
plasma potassium, diurnal cycle potassium and, F1178  
potassium loading and, collecting tubule cell response to, F8  
potassium transport and, medullary collecting tubule, F1136  
receptors selective for, parotid, colon, and pituitary, E467  
responsiveness, angiotensin II sensitization of, plasma sodium, awake state, R832  
sensitivity, A6 cells, C1  
short-circuit current induced by, ileum (chicken), G211  
sodium-potassium-ATPase activity and, cortical collecting tubule, F874

Alkalemia, acidification and, proximal tubules, F89

Alkalinity, data, acid-base balance and, F197

Alkalosis  
carbonic anhydrase, bicarbonate transfer and (shark), R450  
changes, calcium fluxes and contractile state during, heart cells (chick), C137  
ileal secretion and, G330  
metabolic  
acidification and, proximal convoluted tubules, F89  
correction with chloride, F1031

Allantoin, uricase transport function, evidence for, F702

Allergy, gut, anaphylaxis-induced ion transport, G540

Allometry, mass exponent, metabolic scaling, R195

Allopurinol, kinetics, liver function assessment, model, R352

Altitude, adaptation, oxygen flux and (llama), R298

Ameroid, left circumflex constrictor, placement effects, myocardial innervation (swine), H1425

Amidophosphoribosyltransferase, glucagon infusion effects, liver, E684

Amiloride  
bicarbonate transport and, initial collecting tubules (salamander), F310  
calcium transport, bladder (turtle), R917  
collecting tubule, electrophysiology, F1263  
interaction, renal adrenergic receptors, F21  
sensitivity, A6 cells, C1  
sodium-hydrogen antiporter detection, renal papilla collecting cells, F889  
sodium-hydrogen exchange, red blood cells, C60

Amiloride analogues, inhibition of sodium-dependent hexose uptake, LLC-PK, cells (pig), C199

Amines, dietary, distribution in platelets, E312

Amino acids  
cardiovascular response, amygdala, R712  
dietary, decreased myofibrillar proteolysis after refeeding, E52  
imbalance, serotonin and feeding responses, R763  
infusion, leucine metabolism and, E428  
metabolism, kidney cells, F1243  
stimulation of ornithine decarboxylase activity, digestive tract mucosa, G303

transport  
brush border, intestine (flounder), R264  
diabetes and, brain, E575  
fibroblasts, C391  
intestinal adaptation to (trout), G489  
intestinal basolateral membrane, G637  
liver, G351

$\gamma$ -Aminobutyric acid, stimulation of acid secretion, stomach (guinea pig), G601

*p*-Aminohippuric acid  
endotoxin effects, kidney, F244  
uptake, coupling to sodium, renal basolateral membrane vesicles, F795

6-Aminonicotinamide, malformations, embryo, E72

Aminopeptidase, brush border, renal, F649

Aminophylline  
atrioventricular node, heart, adult and neonate, H1192  
coronary blood flow increase, behaviorally induced, H548

Aminopyrine, histamine receptors, parietal cells, G497

Ammonia  
entry, proximal tubule, F760  
hyperoxia effects, muscle, C263  
transport  
cortical collecting tubules, F1232  
proximal straight tubules, F277  
urinary excretion of, F595

Ammoniogenesis  
insulin stimulation of, proximal tubular segments, F1171  
kidney cells, F1243

Ammonium, urea, systemic pH regulation and, F199

Amygdala, chemical and electrical stimulation, cardiovascular response to, R712

$\alpha$ -Amylase  
intracellular, secretagogue-induced, pancreatic acini, G690  
lingual, secretion, lingual serous glands, G217  
release, characterization on pancreatic acini (guinea pig), G793

Amyloid P, blood monokines, inflammation, R922

Anaerobiosis, cardiac tissue (trout), R838

Analgesia, thermoregulation and, hypertension effects, R910

Anal sphincter  
internal  
myogenic tone, G253  
sacral nerve influence on (opossum), G345

Anaphylaxis, ion transport induced by, small intestine, G540

Anemia, glucose dependence in, resting, E461

Anesthesia  
intramycardial blood volume, first moments of cardiac arrest (goat), H307  
pentobarbital, alterations in glucose kinetics, E657

ANF: see Atrial natriuretic factor

Angiotensin  
aprotinin effects, obstructive nephrectomy, F1006  
autoregulation, renal blood flow, F66  
correlates of changes, kidney glomerulus, F111  
cyclic GMP accumulation and, atrial natriuretic factor, C147  
preload-afterload mismatch with, circulation control, H126  
receptor subtypes, kidney cortex, F1  
sodium appetite and, sodium depletion (sheep), R482  
sodium depletion and, vasopressin in, H763

Angiotensin-converting enzyme  
binding sites, conduction system of heart, H1618  
inhibition, modulation of albuminuria by, F719  
intestinal brush-border membrane, role in dietary protein digestion, G781

Angiotensin II  
binding sites, conduction system of heart, H1618  
bradykinin and, intracellular calcium dynamics in endothelial cells, C588  
cytosolic calcium levels and, mesangial cells, F1077  
dehydration and arginine vasotocin, cerebrospinal fluid and plasma (duck), R285  
gluconeogenesis and, proximal tubule cells, F802  
hypertension, cerebral blood flow response to, H47  
interaction, functional smooth muscle cells, C872  
large arteriole constriction to, prostaglandins and, H1573  
leukotriene D<sub>4</sub> effects, kidney glomerulus, F239  
modulatory role of, atrial peptide-induced natriuresis, F880  
phospholipases and, mesangial cells, C113  
potentiation, EGF-induced mitogenesis, proximal tubular cells, F299  
pressor sensitivity to, diabetes, R726  
pressure liability, chronic sinoaortic deafferentation, H466  
release, plasma lymph, during hyperchloremia, F734  
sensitization, aldosterone response, plasma sodium, awake state, R832  
vascular reactivity to, Goldblatt hypertension, H1523  
vasopressin secretion, drinking and, R108

Anions  
band 3-like, kidney collecting duct, F213  
exchange, diphenylamine-2-carboxylate effects, gallbladder (mudpuppy), C79  
exchange pathways, chloride transport, renal microvillus membrane, F513  
inhibitors, Henle's loop and, F1206  
organic, hepatic transport (skate), G816  
transport inhibitors, tracheal apical

- Anions (*continued*)  
 membrane vesicles, C416
- Anorexia, amino acid imbalance, serotonin and feeding responses to, R763
- Anoxia  
 aerobic recovery, cardiac muscle, H325  
 peripheral nerve response, E349  
 transmural wave front, early ischemia, H240
- ANP: see Atrial natriuretic peptide
- Antiarrhythmic agent, class I, inhibition of transient outward current, cardiac muscle, H704
- Antibody, anti-receptor, visualization of ANP receptor on glomeruli, F1058
- Antidiuretic hormone: see also Vasopressin  
 $\alpha$ -adrenergic inhibition of, prevention by pertussis toxin, collecting tubules, C105  
 angiotensin II and, cerebrospinal fluid and plasma (duck), R285  
 DOC-salt hypertension and, F952  
 head-out water immersion, cardiac nerve response, awake state, R242  
 inappropriate, syndrome of, R877  
 mechanism of action, forskolin-treated bladder (toad), F120  
 prostaglandin effects, nephron, F377  
 rubidium secretory flux and, cortical collecting tubules, F76
- secretion  
 inhibition of, oropharyngeal signals and, R509  
 regulation of drinking and, R108
- Antihypertensive drugs, polyamine biosynthesis, spontaneous hypertension and, heart, H262
- Antilipolysis, glucose transport and, diabetes and obesity, E300
- Antioxidant enzymes, maturation, thyroid hormone effects, lung, fetus, R592
- Antipyretic drugs, circadian rhythms, body temperature and, R306
- Antiserum, visualization of ANP receptor and, kidney glomerulus, F1058
- Antithrombin III, total-body radiation, plasma protein catabolism, R383
- Antrum: see Gastric antrum
- Aorta  
 arterial wave travel, primate model (baboon), H299  
 baroreceptors: see Receptors  
 constriction, DOCA-hypertension and (swine), F1223  
 cyclic GMP accumulation, angiotensin effects, C147  
 force and metabolism, phosphocreatine and, H461  
 insufficiency, experimental, contractility in, H1005  
 intracellular calcium levels, phorbol ester-induced contractions, H1365  
 length-dependent sensitivity, hypertension and, H402
- Aortic arch, reflex control, total systemic vascular capacity and, H598
- Aortic depressor nerve, caudal ventrolateral medulla, baroreceptor-vasomotor reflex and, H777
- Apamin, prejunctional inhibition of, G7
- Apical membrane  
 determinants, A6 epithelial cells, C37  
 protamine alteration of, potassium and chloride permeability, gallbladder epithelium (salamander), C662  
 time-dependent potassium and sodium, kidney cells, C1
- Apical membrane vesicles, sulfate transport in, tracheal epithelium, C416
- Apotransferrin, ischemic injury and, intestinal, G49
- Appetite: see Feeding
- Aprotinin, renal effects, after unilateral ureteral obstruction, F1006
- Arachidonate, metabolism, endotoxin effects, pulmonary endothelial cells (pig), C384
- Arachidonic acid  
 epoxigenase metabolites of, vasopressin response and, bladder (toad), F464  
 metabolism  
 glucocorticoids and hypoxic vasoconstriction, salt-perfused lungs, H574  
 polarity of, aortic endothelial cell monolayers (bovine), H1177  
 subcellular distribution, myocardium, C846
- Area postrema  
 lesion, low-frequency arterial pressure oscillations and, H524  
 stimulation, inhibition of renal sympathetic nervous activity, H91  
 vasopressin interaction with, during volume expansion, R605
- L-Arginine, accumulation, membrane potential and, fibroblasts, C391
- Arginine vasotocin, dehydration and angiotensin II and, cerebrospinal fluid and plasma (duck), R285
- ARL 15 cells, ionic dependence, sodium-potassium transport, F26
- Arrhythmias  
 ischemic preconditioning and, myocardial, H1470  
 reperfusion-induced, transient calcium reduction against, H225  
 subendocardial Purkinje fibers in, after myocardial infarction, H662
- Arterial pulse, propagation, nonhuman primate model (baboon), H299
- Arterioles  
 bifurcations, skeletal muscle, vasomotion in, H568  
 cerebral, endothelium-dependent responses, chronic hypertension, H1435  
 diameter, alterations in hypertension, H933  
 intracerebral, cholinergic vasodilation of, H1253  
 large, constriction to angiotensin II, prostaglandins and, H1573  
 oxygen reactivity (hamster), H1120
- Ascorbic acid  
 extracellular space marker, heart, H1305  
 gastric mucin interactions, G93
- A23187: see Ionophore A23187
- Asialoglycoprotein, estrogen treatments and, liver, G195
- Asphyxia, apneic, tachycardia of carotid chemoreceptors, H591
- Aspirin, gastric damage and, G1
- Astrocytes, intracellular pH, cortical stimulation effects, R666
- Atenolol, adrenergic effect, internal cardiac defibrillation threshold, H500
- ATPase: see Adenosine triphosphatase; Hydrogen-ATPase; Sodium-potassium-ATPase
- ATP: see Adenosine triphosphate
- Atrial appendectomy, volume expansion, renal response to, R786
- Atrial cells, muscarinic potassium current in, magnesium ion effects (guinea pig), H210
- Atrial natriuretic factor  
 acute volume natriuresis and, F1129  
 binding and functional effects, kidney, F917  
 cardiovascular and fluid responses to, fetus (sheep), R561  
 cyclic GMP accumulation in, angiotensin effects, C147  
 diuresis induced by, renal autoregulation and pressure natriuresis during, F424  
 Goldblatt hypertension, H1623  
 natriuresis induced by, renal perfusion pressure effects, F234  
 release, heart-lung preparations, H1044
- Atrial natriuretic hormone, tunneling cell processes, stretched atria, H432
- Atrial natriuretic peptide  
 endogenous, rapid atrial pacing and, R599  
 inhibition, epithelial sodium transport, F372  
 natriuresis and, volume expansion, R877  
 receptor, regulation, smooth muscle cell, C809  
 reflex control, sympathetic nerve activity and heart rate, H1136  
 release  
 during tachycardia, R696  
 neural control of, awake state, F1164  
 renal response to, indomethacin effects, F868  
 right atrial pressure and sodium excretion relations, F969  
 solute gradients and, renal medullary, F679  
 transcription, myocardial infarction, H1449
- Atria: see Heart atria
- Atriopeptin III, mesenteric resistance vessels and, spontaneous hypertension, H1612
- Atriopeptins  
 cytosolic calcium levels and, mesangial cells, F1077  
 inhibition, epithelial sodium transport, F372
- Atrioventricular nodal conduction  
 antegrade vs. retrograde, differential vagal effects on, H1059  
 postpacing tachycardia and, H333
- Atrioventricular node  
 accommodation and hysteresis, transplantation effects, H1514  
 adenosine and hypoxia effects, heart, adult and neonate, H1192  
 angiotensin II binding sites, H1618  
 artery, anatomical variations, H968  
 nucleus ambiguus stimulation effects, R150
- Atrioventricular valves, automatic fibers in, electrophysiological properties of, H720
- Atropine  
 GRP nerves, antrum (pig), G643  
 resistance: see Resistance  
 stimulus train, atrial fibrillation threshold and, H863  
 thermic effects of food and, E481
- Auerbach's plexus, cAMP-generating sys-

tem,  $\beta$ -adrenoceptors associated with, G378

Automaticity, subsidiary atrial, electrophysiological properties, H720

Autonomic nervous system

- acetylcholine release, atrial fibrillation threshold and, H863
- carotid baroreceptor-muscle relations, R929
- pulmonary vasodilation, arginine vasopressin-induced, H493
- thermogenesis and, E481

Autoradiography

- cerebral blood flow, [ $^{14}$ C]iodoantipyrine and microsphere technique, H1289
- electron microscopic, arachidonic acid distribution, myocardium, C846
- ouabain binding, ventral skin (tadpole), R402, R410

quantitative

- 1,25-dihydroxyvitamin D<sub>3</sub>, islet development, E99
- glucose utilization, brain, E453
- receptor, angiotensin II and smooth muscle cells, C872
- renin distribution, exogenously administered, kidney, E621

Autoreceptors: see Receptors

Autoregulation

- aortic constriction and renal denervation, DOCA-hypertension (swine), F1223
- blood flow, response to endogenous prostaglandins, F66
- cerebral blood flow, during intracranial hypertension, hypoxia (lamb), H1342
- coronary,  $\alpha$ -adrenergic blockade effects, H365
- coronary vasoconstriction,  $\alpha$ -adrenoceptor-mediated, awake state, H388
- head-out water immersion, renal circulatory response to, R254
- myogenic, renal arterial caliber, F778
- splanchnic circulation, hypertension, G146
- thyroid, impact on structure and function, E165

AVP: see Vasopressin, arginine

Awake state

- $\alpha$ -adrenergic agonists, baroreflex mechanisms buffering, H728
- adrenergic pressor responses, calcium channel modulation and, H531
- aging, renal function, R555
- ANP release, neural control of, F1164
- AVP release and heart rate, hemorrhage, H1012
- blood volume and plasma sodium concentration, after water intake, R15
- chemical and electrical stimulation, cardiovascular response to, R712
- coronary vasoconstriction,  $\alpha$ -adrenoceptor-mediated, H388
- DOC-salt hypertension, vasopressin role in, F952

endotoxic shock

- cardiac nerve response to, R242
- naloxone and regional cerebral perfusion, R425
- renal circulatory response to, R254

frequency-dependent myocardial depression, verapamil-induced, H487

glucose homeostasis, somatostatin effects, fasting, E435

glucose utilization, cerebral cortex, insulin effects (goat), E418

heart rate, baroreceptor control of (monkey), H811

hemodynamic monitoring, cardiac output, H1335

oxygen transport and cardiac output, postnatal changes, awake state (lamb), H100

preload and prostacyclin, vagal reflex mechanism, H1477

pressure liability, chronic sinoaortic deafferentation, H466

pulmonary vasodilation, arginine vasopressin-induced, H493

regional ventricular segmental dynamics, H713

sinoaortic denervation, control of arterial pressure in (sheep), H1409

sodium depletion, vasopressin in, H763

Azotemia, protein metabolism in, muscle, F164

# B

Bacteremia, 3-O-methylglucose transport, soleus muscle, R55

Barium

- electrophysiological characterization, collecting tubules, F1263
- potassium channels, proximal tubules (salamander), F488
- sensitivity, A6 cells, C1

Barium chloride, myenteric plexus ablation, temporal changes in jejunal smooth muscle and, G745

Basement membrane, potassium channels, proximal tubule (salamander), F476

Basolateral membrane

- amplification, response to aldosterone and potassium, F8
- IGF receptors in, proximal tubular cells, F841
- insulin uptake, proximal tubules, F857
- intestinal

  - glucose transport, rapid adaptation of, G54
  - lysine transport, G637

- potassium channels, proximal tubule (salamander), F476, F488
- proximal tubule, sodium bicarbonate co-transport across (mud puppy), F340

renal

- stretch-activated potassium channels, F1253
- succinate and citrate transport in, F432
- TEA transport, F1040
- sodium chloride reflection coefficient, proximal tubule, F290
- taurine transport, liver, G351

Basolateral membrane vesicles

- ileal, chloride-sulfate exchange, G404
- renal, PAH coupling to sodium in, F795

Behavior

- licking, amiloride-sensitive sodium channels and, R371
- operant, sodium depletion and (sheep), R482
- sucrose-supplemented feeding and, hyperactivity, R434

Benzalkonium chloride, myenteric plexus ablation, temporal changes in jejunal smooth muscle and, G745

Benzodiazepines, circadian clock and (hamster), R204

Benzolamide, carbon dioxide, bicarbonate transfer and (shark), R450

Betazole, histamine receptors, parietal cells, G497

Bethanechol

- acid secretion and, G298
- QNB binding and contraction, colonic smooth muscle cells, G656
- synergism, agonist combinations in pepsinogen secretion (frog), G557

B-HT 920, vascular resistance and, coronary collateral circulation, H582

Bicarbonate

- absorption

  - acid secretion and, colon (guinea pig), G155
  - metabolic alkalosis, proximal tubules, F89

- correction of chronic metabolic alkalosis, F1031
- excretion, gill and red cell carbonic anhydrase in (shark), R450
- infusion, sample site selection for tracer studies, E173
- production, nitrite effects, colon, G246
- reabsorption

  - hypocalcemia and, acute volume expansion, renal, F726
  - micropuncture study, proximal tubule (starling), R587
  - sodium-hydrogen antiporter in posthypercapnia, F833

- secretion, carbon dioxide partial pressure in gastric juices and, G527
- steady-state pH and, proximal straight tubules, F282
- transport

  - alkalinity measurement of cellular net acid-base fluxes, C525
  - collecting tubules, F816
  - cortical collecting tubules, F1232
  - initial collecting tubule (salamander), F310
  - proximal convoluted tubule, F912
  - proximal straight tubules, F277

Bicarbonate sulfate, exchange, canalicular liver plasma membrane vesicles, G461

Bicuculline, acid secretion and, stomach (guinea pig), G601

Bile

- IgA and SC secretion into, cholestasis effects, G232
- intact, excretion of prostaglandins and, weanling, G787

Bile acids

- development and, distal colon, G483
- transport, liver (skate), G816

Bile salts

- absorption, intestine (killifish), G730
- micellar solutions, cholesterol and  $\beta$ -sitosterol in, G268
- sinusoidal, uptake system, liver (skate), G816

Biliary excretion

- age-dependent, glutathione-related thiols, G86
- prostaglandins, gastrically administered, G787

Biotin, sodium gradient-dependent transport for, intestinal brush-border membrane vesicles, G631

2',7'-Biscarboxyethyl-5(6)-carboxyfluorescein, cytoplasmic pH regulation, sodium-hydrogen antiport activity and, C193

Bladder: see Gallbladder; Urinary bladder

# Blockade

## adrenergic

catecholamine role in, acute hypoxia, fetus (sheep), H927

chronic sinoaortic deafferentation, H466

## $\alpha$ -adrenergic

apneic asphyxia and, H591

coronary autoregulation and, H365

## $\beta$ -adrenergic

cholinergic receptor and, preferential coronary vasodilation and, H604

thermogenesis induced by, obesity, E65

calcium channels, pituitary, C162

ganglionic, pressor sensitivities in diabetes, R726

neuromuscular, hormonal changes and substrate mobilization during, R687

neuronal uptake, increased heart rate and, normal myocardium, H1581

# Blood

antidiuretic hormone, angiotensin II and (duck), R285

CCK-58 detection in, G477

clots, fibrin and erythrocytes, H1069

gas: see Gas

glucose transfer into, cochlea, F59

hematocrit-measuring oximeter, H147

property, transient flow resistance, H919

sampling

growth hormone and insulin secretion, feeding relations, R772

radiiodide and perchlorate kinetics and, model, E691

repeated, chronic vascular access for, H992

velocity, wrist occlusion and, hypertensive men, H217

viscosity, small tubes, H540

volume: see Volume

# Blood-brain barrier

permeability, after osmotic opening, R459

regional amino acid transport, diabetes and, E575

# Blood flow: see also Circulation;

Microcirculation

adipocytes and adipose tissue, obesity and, R228

cardiac receptor modulation of, jejunum, G116

## cerebral

adenosine regulation of, H165

autoregulation, during intracranial hypertension (lamb), H1342

endogenous opioids and, E565

hypotension effects, endotoxemia (pig), H956

hypothermia effects, newborn (pig), H869

hypoxia and hypercapnia interaction effects, H890

MCA occlusion and, H454

microsphere estimates, [<sup>14</sup>C]iodoantipyrine and, H1289

naloxone and endotoxemic shock effects, awake state, R425

$\beta$ -receptor-mediated increase, during hypoglycemia, H949

response to hypertension, H47

trigeminal ganglion stimulation effects, R270

## coronary

$\alpha$ -adrenoceptors and, awake state, H388

autoregulation,  $\alpha$ -adrenergic blockade effects, H365

behaviorally induced increases, aminophylline effects, H548

reactive hyperemia, awake state, H25

regulation during norepinephrine infusion (guinea pig), H1184

distribution, arteriolar network architecture, H154

glycogenolysis and, nervous control, liver, E238

gravid uterus, several stages of gestation (cow), R735

hybrid probe, H<sub>2</sub> clearance and laser-Doppler velocimetry, G573

intestinal, experimental diabetes mellitus and, G26

## muscle

endothelium-dependent dilation, resistance-sized vessels, H234

inadequate oxygen delivery effects, H1199

myocardial, microsphere depositions in, H184

nerve, exsanguination and, E349

non-Newtonian behavior, viscosity in small tubes, H540

peripheral, head-out water immersion effects, awake state, R254

potassium secretion and, nasal salt glands (lizard), R83

pulmonary, after acute hypoxia, fetal (sheep), H941

ratio, coronary collateral, development (swine), H1279

## regional

complement activation and (swine), H58

influence of reduced red cell deformability, H898

intestinal denervation effects, newborn (swine), G201

parathyroid hormone effects, R634

## renal

adrenergic agonists in Goldblatt hypertension, H1523

aging, awake state, R555

altered, responses to nerve stimulation, F976

ANP during angiotensin II infusion, renal, F880

autoregulation of, prostaglandins and, F66

changes induced by AVP, inner medullary, F576

norepinephrine release, prostaglandins in, F929

pressure natriuresis and, ANF-induced diuresis, F424

reduced, diabetes and, H845

renin and angiotensin II release during hyperchloremia, F734

sodium depletion, vasopressin in, H763

skeletal muscle, muscle pump in exercise hyperemia, H993

splanchnic changes, renal hypertension, G146

systemic, temperature effects (snake), R222

Blood-nerve barrier, calcium content, chronic hypercalcemia and hypocalcemia (frog), R655

## Blood-perilymph barrier

evidence for, inner ear fluids, F50

glucose transfer into, cochlea, F59

Blood pressure: see also Pressure

arterial, vasopressin and enkephalin release and, adrenalectomy, R467

cerebrospinal fluid kinin and, R137

control, acute resetting of baroreflexes, hypertension and, H974

diurnal patterns of, nonhuman (monkey), R779

fluctuations

beat-to-beat model, H680

hypertension, H176

muscle, inadequate oxygen delivery effects, H1199

renin-aldosterone axis and, cyclosporin effects, H1596

response, calcium metabolism and, saturation kinetics model, R501

sodium appetite, angiotensin role in (sheep), R482

sympathetic alterations, medullary raphe lesions, R91

temperature effects (snake), R222

vasopressin secretion

drinking and, R108

inhibition of, oropharyngeal signals and, R509

## Blood vessels

drug action, spare receptors and, E114

esophagus plexus submucosus, substance P binding sites, R167

resistance-sized, endothelium-dependent dilation in, H234

responsiveness, ultrasound in, H671

viscoelastic, fluid exchange, skeletal muscle, H1548

## Body

composition

high-fat diet and adrenalectomy effects, E149

pregnancy and (hamster), R314

water balance, nasal heat and (seal), R883

weight: see Weight

## Bombesin

gastrin and somatostatin release and, stomach, G206

GRP nerves, antrum (pig), G643

pancreatic, synergistic inhibition of sham feeding, R719

synergism, agonist combinations in pepsinogen secretion (frog), G557

## Bone

density, dietary calcium and, R501

proton-induced calcium release, mechanism of, F998

red cell deformability, regional blood flow and, H898

resorption, hydrogen stimulation of, E90

Bowel, irritable, stress and, corticotropin-releasing factor mediation of, G582

Brachial artery, wrist occlusion effects, hypertensive men, H217

## Bradykinin

angiotensin II and, intracellular calcium dynamics in endothelial cells, C588

arterial infusion, skin lymph protein clearance after, H1462

endothelium-dependent relaxation and, vascular smooth muscle, H1074

- free calcium and, renal cells, F328  
neurosecretory vasopressin cells and, R234  
visceral afferents and, H556

 conjugated, pulmonary artery, H66  
 erythrocyte levels, DOCA-salt hypertension, H270  
 free and sulfate-conjugated, distribution in platelets, E312  
 glycogenolysis and, liver, aging effects, E277  
 histofluorescence, myocardial innervation (swine), H1425  
 hormones and substrates, during neuromuscular blockade, R687  
 inotropic effects of, acidoses and, heart, newborn, H1441  
 iron deficiency, glucose dependence in, resting, E461  
 lipolysis and, adaptation in exercise, E383  
 plasma, response to cardiac arrest, E283  
 receptors: *see* Receptors  
 regulation, renal cortical adrenergic receptors, F1063  
 release, hemorrhage and, adrenalectomy, R467  
 respiratory stimulation and, brown fat cells (hamster), C301  
 secretion, corticotropin-releasing factor and acetylcholine effects, R209
- Catechol methyltransferase, erythrocyte levels, DOCA-salt hypertension, H270
- Cathepsin, activity, proximal tubule, F1290
- Cathepsin B, redistribution, pancreatitis, G508
- Cations  
 apical selectivity, A6 epithelia, C1  
 divalent, sodium-calcium exchange and, ventricle (bullfrog), C45  
 organic  
 secretion, renal tissue (flounder), R861  
 transport, renal tubules (snake), F656  
 proton/organic, exchange, luminal membrane vesicles, kidney, F141
- Caudal ventrolateral medulla, depressor neurons in, baroreceptor-vasomotor reflex and, H777
- Caudate nucleus, norepinephrine- or angiotensin II-induced hypertension, blood flow response to, H47
- Caval constriction, chronic, sodium excretion in, role of hepatic nerves, F672
- CCK: *see* Cholecystokinin; Cholecystokinin-58; Cholecystokinin octapeptide
- Cecum, ion transport, short-chain fatty acid transport effects, G171
- Cell: *see* specific type of cell; *see also* Volume, cell
- Cellular messengers, synergism, agonist combinations in pepsinogen secretion (frog), G557
- Central nervous system  
 acoustic and cold stress, gastrointestinal transit and, G124  
 corticotropin-releasing factor, gastric emptying and, G241  
 modulation, renal hypertension, R568  
 opioid mechanisms, hemorrhagic hypotension, H507  
 processing, cardiovascular reflexes, H1127
- Cerebral artery, middle, contralateral cortex of, stroke and brain oxygen consumption, H454
- Cerebral cortex  
 glucose utilization, insulin effects, awake state (goat), E418  
 stimulation of astrocytes, intracellular pH with, R666  
 thermogenesis controlled by, lateral hypothalamic lesion and overeating effects, R626
- Cerebral ventricles, anteroventral third, vasoconstrictor and vasodilator sites in, R827
- Cerebrospinal fluid  
 antidiuretic hormone, angiotensin II and (duck), R285  
 bulk flow, acute hyperosmolality and, F538  
 inner ear, blood-perilymph barrier, F50  
 kinins, cardiovascular functions and, R137
- cGMP: *see* Guanosine monophosphate, cyclic
- Chemoreceptors: *see* Receptors
- Chief cells  
 protein phosphorylation, histamine effects, G823  
 secretory apparatus, hormonal effects on development, G274

 absorption  
 epithelial tissues, C177  
 nitrite effects, colon, G246  
 brain, regulation during acute hyperosmolality, F522  
 conductance pathway, SITS-sensitive, intestinal cells (chick), C693  
 correction of chronic metabolic alkalosis, F1031  
 interactions, erythrocyte anion exchange system, C652  
 permeability, apical membrane, protamine alteration of, gallbladder epithelium (salamander), C662  
 potassium secretion dependent on, distal tubule, F555
- reabsorption, hypocalcemia and, acute volume expansion, renal, F726  
 reversal of hemorrhagic shock, H751  
 secretagogues, basolateral potassium conductance and, corne (frog), C555
- secretion  
 ionophore A23187 and phorbol ester effects, tracheal epithelium, C828  
 regulation by protein kinase C, tracheal epithelium, C802  
 steady-state pH and, proximal straight tubules, F282
- transport  
 anion exchange pathways for, renal microvillus membranes, F513  
 medullary collecting duct, F203  
 pH effects, thick ascending limb of Henle's loop, F1216  
 short-chain fatty acid transport and, cecum, G171  
 thick ascending limb of Henle's loop, F1206  
 uricase transport function, evidence for, F702
- Chloride-bicarbonate exchange  
 alkalinity measurement, cellular net acid-base fluxes, C525  
 diphenylamine-2-carboxylate effects, gallbladder epithelium (mudpuppy), C79  
 oxyntic cells, stomach, fluorescence microscopy, C30
- Chloride ions, microelectrodes selective to, C343
- Chloride-sulfate exchange, carrier-mediated, ileal basolateral membrane vesicles, G404
- $\alpha$ -Chloroisocaproic acid, metabolism, skeletal muscle in endurance training, E645
- Chloroquine, lipid metabolism and, intestinal, G673
- Chlorothiazide, sodium chloride cotransport and, distal tubule, F546
- Chlorpromazine, sodium-potassium-ATPase pumping and solute transport, hepatocytes, G613
- Chlortetracycline, calcium signals, vascular muscle cells (ferret), H1456
- Cholecystokinin  
 food intake and, mechanisms, R379  
 gastric distension and, activation of oxytocinergic cells, hypothalamus, R661  
 internalization and secretion, pancreatic duct fluid, G445  
 intragastric pressure in response to, reflex decreases in, G165  
 motilin and, sphincter of Oddi and duodenal motility (prairie dog), G679  
 pancreatic, synergistic inhibition of sham feeding, R719  
 receptors: *see* Receptors  
 secretion, mediated by protein kinase c, fundic D-cells, G62
- Cholecystokinin octapeptide  
 gallbladder sensitivity to, irritable bowel syndrome, G650  
 secretion, cholinergic pathway, G706
- Cholecystokinin-58, detection, blood, G477
- Cholelithiasis, oxygen radicals and, gallbladder (guinea pig), G627
- Cholera toxin  
 acid-base, ileal secretion and, G330  
 cAMP-mediated cholinergic transmission, myenteric plexus, G607

- Cholera toxin** (*continued*)  
inhibition of ADH action and, collecting tubules, C105
- Cholestasis**  
estrogen treatment and, liver, G195  
IgA and SC secretion, bile, G232
- Cholesterol**  
content, kidney membranes, aging and, R8  
distribution, micellar bile salt solutions, G268  
plasma membrane fluidity and, endothelial cells, C672  
synthesis, localization, villus-crypt axis, diabetes and, G336  
transport, plasma lipoproteins, E1
- Choline**  
correction of chronic metabolic alkalosis, F1031  
NMN transport and, kidney tubules (snake), F656  
uptake and degradation surfactant, granular pneumocytes, C792  
uricase transport function, evidence for, F702
- Cholinergic pathway**, enzyme secretion, pancreatic polypeptides, G706
- Chromatography**  
anion-exchange, PDGF effects, mesangial cells, F458  
high-performance liquid  
heat-stable toxin and guanyl cyclase activation, G775  
liver function assessment, model, R352  
high-pressure liquid, CCK-58 detection in blood, G477  
ion exchange, degradation of gastrin (pig), G33  
luminal digestion, lactoferrin, suckling and weanling, G397
- Chylomicrons**  
fatty acid isomers and, intestines, G751  
lipid metabolism and, intestines, G673
- Cimetidine**  
high carbon dioxide partial pressure, gastric juices, G527  
histamine receptors, parietal cells, G497  
transport, luminal membrane vesicles, kidney, F141
- Circadian rhythms**: *see* Rhythms
- Circannual cycle**, adipocyte hyperplasia, resistance in high-fat diets (squirrel), R576
- Circulation**: *see also* Blood flow;  
Microcirculation  
coronary  
carbon dioxide diffusional shunting, H614  
input impedance during cardiac cycle, H317  
tachycardia and myocardial ischemia (pig), H422  
coronary collateral  
 $\alpha$ -adrenergic receptors in, H582  
development, myocardium (swine), H1271  
left circumflex Ameroid constrictor placement effects (swine), H1425  
gastric mucosa, laser-Doppler velocimetry, G573  
hepatic, adrenoceptors in, H1053  
peripheral, angiotensin, H126  
pulmonary, eicosanoids in, neonate (lamb), H626  
renal, head-out water immersion effects, awake state, R254  
splanchnic, changes during renal hypertension, G146  
systemic, aortic arch reflex control, H598  
temperature effects (snake), R222  
thoracic pressure and, cardiac chamber interaction, H1240  
Cirrhosis, sodium excretion, hepatic nerves and, F664
- Citrate**  
transport, renal basolateral and brush-border membrane, F432  
urinary excretion of, F595
- Clearance**  
free water, chronically cannulated fetus (sheep), R389  
metabolic  
1,25-dihydroxyvitamin D<sub>3</sub>, E246  
portal-hypertensive model, G110  
renal, organic cations (flounder), R861  
transplacental, gravid uterus, during gestation (cow), R735  
water, renal, indomethacin and ANP in, F868
- Clenbuterol**, muscle growth induced by, insulin and, E370
- Clorisonadamine**, pressure liability, chronic sinoaortic deafferentation, H466
- CNS**: *see* Central nervous system
- Coagulation**, intravascular, lung changes after, H634
- Cochlea**, blood, glucose transfer into, F59
- Coenzyme A**, myocardial, degradation by fatty acids, H41
- Coenzyme A reductase**, 3-hydroxy-3-methylglutaryl, platelet-derived growth factor effects, C567
- Cold**  
acclimation, adaptation to extreme temperatures and (gerbil, mouse), R39  
diet and, cafeteria feeding, E264  
enzymes and uncoupling protein response in, brown fat, E255  
exposure  
insulin effects on glucose uptake and, E179  
lactation and, brown fat, E515  
modulation of receptors and adenylate cyclase activity, E629  
stress, gastrointestinal transit and, G124
- Collagen**  
degradation, renal brush border, F649  
lung growth, postpneumonectomy, E6  
type IV, glomerular capillary wall and basement membrane, F783
- Colon**  
acid secretion in (guinea pig), G155  
cAMP-generating system,  $\beta$ -adrenoceptors and, G378  
contents, short-chain fatty acids, G427  
distal, development of, taurodeoxycholate effects, G483  
epithelial cell line, vasoactive intestinal peptides and protein phosphorylation in, G420  
ionic movement in  
aldosterone-induced, amiloride-inhibitable (chicken), G211  
nitrite effects, G246  
peristalsis, somatostatin neurons in, G434  
proximal, motility, control by sympathetic nervous system, G531  
smooth muscle cells, QNB binding and contraction in, G656  
stress effects, corticotropin-releasing factor effects, G582  
type I receptors, aldosterone selective, E467
- Compartmental analysis**, stereological, thyroid autoregulation and, E165
- Compartmentation**, intercellular, calmodulin-calcium complex, liver lobule, G383
- Complement**, activation, increased vascular resistance during (swine), H58
- Complement complex** C5b-8, prostaglandin formation and, endothelial cells (pig), C13
- Compliance**  
carotid sinus, renal hypertension and, R568  
intramyocardial, first moments of cardiac arrest (goat), H307  
peripheral circulation, angiotensin, H126  
vascular, cortisol infusion and, fetus (sheep), R904
- Conduction**, preferential, right atrium, H16
- Conductivity**, hydraulic, proximal tubule, F290
- Contraction-activation coupling**: *see* Coupling
- Converting enzyme**, inhibition, modulation of albuminuria by, F719
- Cooling**, selective, brain (reindeer), R848
- Corneal epithelium**, potassium conductance, chloride secretagogue effects (frog), C555
- Coronary artery**  
endothelial cells, ambient oxygen effects, H878  
relaxation, electrical stimulation, free radical role in, H884
- Coronary flow**: *see* Flow
- Coronary occlusion**  
chronic,  $\alpha$ -adrenergic receptors and, H582
- DC electrograms** during, epicardial, regional denervation effects (pig), H138
- hypertension** after, chronic hypertension with left ventricular hypertrophy, H1148  
segment shortening, ischemic margin, H826  
transient calcium reduction, protective effect of, H225
- Coronary sinus**  
afterdepolarizations, reduction of sodium concentrations and, H115  
rapid atrial pacing, endogenous ANP released by, R599
- Corticosteroids**, prostaglandin effects, nephron, F377
- Corticosterone**  
blood level, interleukin 1 and, R794  
concentration, cation homeostasis and (bird), R20  
<sup>3</sup>H-labeled, type I receptors, parotid, colon, and pituitary, E467  
intestinal growth and, artificially reared pups, G802  
obesity, VMH and PVN lesions and, R523  
reticular neurons and, R25  
rhythms, long and short days, male (hamster), R321  
secretory apparatus development and, parietal cells, G284

short-circuit current, ileum (chicken), G211  
 Corticotropin-releasing factor  
   acoustic and cold stress, gastrointestinal transit and, G124  
   CNS action of, inhibition of gastric emptying, G241  
   comparison with acetylcholine, catecholamine secretion and, R209  
   stress effects, colon, G582  
 Cortisol  
   infusion, heart rate and, fetus (sheep), R904  
   rhythms, long and short days, male (hamster), R321  
   serum, response to cardiac arrest, E283  
 Countershock, electric, improved cardiac cell excitation (chick), H1418  
 Coupling  
   contraction-activation, calcium binding to cardiac troponin C (cow), C541  
   excitation-contraction  
     calcium release channel, ryanodine, C364  
     extracellular calcium effects, extraocular muscle, C375  
     heart cells, young and adult, H1484  
     rest and ryanodine effects, heart, C398  
     twitch tension during calcium overload, heart (sheep), H1540  
   sodium-potassium, measurement, proximal tubules, C126  
   solute-solvent, osmotic water flow and, proximal tubules, F1091  
   stimulus-response, complement and prostaglandin formation, endothelial cells (pig), C13  
   stimulus-secretion, colonic epithelial cell line, G420  
 Creatine, elevation, force and metabolism in aorta and, H461  
 Creatine kinase, binding, cardiac myofibrils, C444  
 Creatine phosphate  
   mitochondrial content, iron-deficient muscle, C639  
   myocardial metabolism, coronary flow relations, H1098  
 Creatinine, urinary excretion of, F595  
 Cryoprotectants, freeze tolerance, organ-specific metabolism and freeze-thaw cycles (frog), R292  
 Crypt cells, localization of cholesterol synthesis along, diabetes and, G336  
 CSF: see Cerebrospinal fluid  
 Curare, hormonal changes, substrate mobilization and, R687  
 Current  
   membrane, calmodulin antagonist effect, ventricular and vascular myocytes, H1601  
   short-circuit  
     mucosal response to, ileum (guinea pig), G323  
     taurodeoxycholate and developing colon, G483  
 Cycling, cross-bridge, skeletal muscle contraction in hypothyroidism, E214  
 Cycloheximide  
   cAMP role  
     gonadotropin secretion, pituitary, male, E296  
     gonadotropin secretion, pituitary, female, E290

Cyclooxygenase  
   inhibition, pregnancy and, kidney, F158  
   modulation of sensitivity, vascular smooth muscle, H1492  
   pathway inhibition, arginine vasopressin-induced, H493  
   pulmonary epithelial cells, endotoxin-treated (pig), C384  
 Cyclosporin, blood pressure, renin-aldosterone axis and, H1596  
 Cytochalasin D, apical surface, bladder (toad), C707  
 Cytochrome oxidase  
   inhibition of protein synthesis, skeletal muscle mitochondria, C866  
   noradrenergic stimulation of mitochondrialogenesis, brown adipocytes, C889  
   oxidizable fraction of, detection in intact brain, C477  
 Cytoskeleton  
   absorptive cell tight junctions and, intestinal, C171  
   contraction, intestinal tight junction structure alteration and, C854

# D

Dantrolene, calcium levels and, osteoblast-like cells, E45  
 Deconvolution, insulin absorption, subcutaneous, model, E584  
 Deferoxamine, ischemic injury and, intestinal, G49  
 Defibrillation, microlesion formation, shock effects, H480  
 Deglycosylation, enzymatic, sodium-potassium-ATPase localization, pancreas and parotid, G99  
 Dehydration  
   arginine vasotocin and angiotensin II and, cerebrospinal fluid and plasma (duck), R285  
   vasopressin secretion, inhibition of, oropharyngeal signals and, R509  
 Denervation  
   cardiac, nicotinic supersensitivity and, H394  
   intestinal, vascular response to arterial hypoxia and, newborn (swine), G201  
 Deoxycorticosterone, sodium-dependent effects, cellular transport, cortical collecting duct, F753  
 Deoxycorticosterone acetate  
   hypertension  
     aortic constriction and renal denervation effects (swine), F1223  
     skeletal muscle, R396  
     rubidium secretory flux and, cortical collecting tubules, F76  
 Deoxyglucose, uptake, insulin and cold exposure effects, E179  
 2-Deoxyglucose  
   metabolites of, dephosphorylation, brain, model, E453  
   uptake and phosphorylation, endotoxin-treated skeletal muscle, E33  
 2-Deoxy-D-glucose  
   action potential duration and, ventricular muscle, during energy block, H373  
   hypothalamus, adrenal nerve activity and, R418  
 2-Deoxy-D-glucose 6-phosphate, insulin effects, cerebral cortex (goat), E418  
 Deoxyribonucleic acid

polyamines and, gastric damage, G1  
 synthesis, liver regeneration, G439  
 Depolarization  
   diastolic, atrioventricular valves, H720  
   membrane, transmural pressure and, renal arteries, F778  
 Desferrioxamine, iron chelator, postischemic ventricular dysfunction, H1372  
 Desipramine, inotropic response decay, normal myocardium, H1581  
 Desynchronization, internal, circadian pacemaker and sleep onset, R172  
 Deuterium oxide, transplacental clearance and blood flow during, gravid uterus (cow), R735  
 Development: see also Growth; Maturation

- Glia, intracellular pH, cortical stimulation effects, R666
- Glomerulonephritis, PDGF effects, mesangial cells, F458
- Glomerulotubular balance, flow rate effects, F582
- Glucagon  
blood level, interleukin 1 and, R794  
hormones and substrates, during neuromuscular blockade, R687  
infusion, purine synthesis and, liver, E684  
insulin deficiency and, protein catabolism, E208  
insulin extraction and, liver, E603  
intestinal, experimental diabetes mellitus and, G26  
intraportal infusion, splanchnic and renal responses to, F1105  
metabolism, portal-hypertensive model, G110  
pancreatic, synergistic inhibition of sham feeding, R719  
potassium depletion effects, collecting tubule, F408
- Glucocorticoid hormones, antioxidant enzyme maturation and, lung, fetus, R592
- Glucocorticoids  
hydrogen-ATPase and, adrenalectomy effects, F495  
hypoxic vasoconstriction and, salt-perfused lungs, H574  
pulmonary epithelial cells, endotoxin-treated (pig), C384  
regulation of sodium-hydrogen exchanger, proximal cells, F945
- Glucocorticosteroids, compensatory lung growth and, E343
- Gluconeogenesis  
ammoniogenesis and, proximal tubular segments, F1171  
glycolysis and, kidney (chicken), R679  
hormonal regulation of, proximal tubule cells, F802  
pentobarbital anesthesia and, E657  
somatostatin effects, fasting and, E435
- Glucoprivation, insulin-induced, suckling and feeding, R121
- Glucosamine, mechanisms of incorporation, platelet-derived growth factor stimulated, C567
- Glucose  
behavioral effects, hyperactivity and, R434  
blood, insulin effects, adrenomedullated exercising rats, R535  
caloric source, parenteral feeding, E158  
carbohydrate oxidation and, E376  
dependence, resting and iron deficiency, E461  
dialysis, human tissue, E228  
fasting effects, pregnancy, E40  
homeostasis  
during fasting, nonesterified fatty acid effects, E443  
interleukin 1 effects, R794  
somatostatin effects, fasted awake state, E435
- infusion  
intestinal, insulin extraction and, liver, E603  
urea production and, E543
- kinetics  
alterations in pentobarbital anesthesia, E657  
diabetes, during Gram-negative infection, E123  
lactate production from, food restriction effects, adipocytes, E336
- metabolism  
endotoxin-treated skeletal muscle, E33  
hydroxybutyrate-induced malformations and, embryo, E72  
kidney (chicken), R679  
myocardial, ischemia and reperfusion, H107  
sodium absorption and, renal, F820  
sodium-potassium-ATPase and, MDCK cells, C269  
norepinephrine levels induced by, obesity resistance and, R475  
oxidation, insulin passage and, capillary endothelium, adipose tissue, E475  
reversal of hemorrhagic shock, H751  
thermogenesis and, postprandial, E521  
total parenteral nutrition based on, energy expenditure after, E135  
transfer, blood into perilymph, cochlea, F59
- transport  
exercise-induced increase, muscle, E331  
fasting-mediated alteration studies, obese women, E193  
intestinal, rapid adaptation, G54  
intestinal adaptation to (trout), G489  
lipolysis and, diabetes and obesity, E300
- turnover  
heterothermy and (lizard), R77  
high-altitude adaptation and (llama), R298
- uptake  
insulin effects, skeletal muscle, E12  
insulin effects after cold exposure, E179  
physical training and, muscle, liver, and adipose tissue, E489
- utilization  
hyperinsulinemia and hyperglycemia effects, tissue, fetus, E616  
insulin effects, cerebral cortex, awake state (goat), E418  
local, cerebral, E453  
suckling period, E142
- D-Glucose, transport, sodium-dependent, kidney (pig), F151
- Glucose-6-phosphatase, utilization, cerebral, E453
- Glucose tolerance test, norepinephrine levels, obesity resistance and, R475
- Glutamate, area postrema stimulation, inhibition of renal sympathetic activity, H91

Glutamate dehydrogenase, hyperoxia effects, muscle, C263

Glutamine  
ammoniogenesis and, proximal tubular segments, F1171  
flow, interorgan, metabolic acidosis, F1069  
glucose infusion and, urea production, E543  
sodium-potassium-ATPase and, MDCK cells, C269

$\gamma$ -Glutamyltransferase, glutathione and, biliary excretion, G86

Glutathione  
cytotoxicity, gastric mucosal cells, G40  
 $\gamma$ -glutamyltransferase and, biliary excretion, G86  
oxygen metabolites and, acute renal failure, F685  
reduced, proximal tubule, F1120

Glutathione peroxidase, thyroid hormone effects, lung, fetus, R592

Glycemia, growth hormone and insulin secretion, feeding relations, R772

Glycerol  
insulin action on, obese women, E193  
lipolysis and, adaptation in exercise, E383

$\alpha$ -Glycerophosphate dehydrogenase, brown fat function, T<sub>3</sub> and, E255

Glyceryl trioleate, chloroquine effects, intestines, G673

Glycine  
<sup>14</sup>C-labeled, purine synthesis, glucagon effects on, liver, E684  
progastrin processing intermediates, G502

Glyccocalyx, vasopressin-induced changes, apical surface of bladder (toad), C707

Glycogen  
muscle  
exercise effects, E331  
repletion, active postexercise recovery, E305  
synthesis, liver, computer model, E360  
transport, skeletal muscle, E12  
turnover, liver, computer model, E360

Glycogenolysis  
blood flow and, nervous control, liver, E238  
muscle, insulin effects, exercise and, R535

Glycolysis  
action potential duration and, ventricular muscle, during energy block, H373  
aerobic, sodium-potassium-ATPase and, MDCK cells, C269  
gluconeogenesis and, kidney (chicken), R679  
hyperoxia and, muscle, C263

Glycoprotein  
 $\alpha_1$ -acid, iodine-labeled, total-body decay curves, R383  
band 3, kidney collecting duct, C323  
MDCK, cell surface distributions, C433  
secretion, gallbladder, oxygen radical effects (guinea pig), G627

Glycosaminoglycans, IGF stimulation, endothelial cells, E21

Glycylsarcosine, dipeptide reabsorption, proximal tubule, F448

GMP: see Guanosine monophosphate

Gonadotropin

photoperiod effects, hibernation (hamster), R337

regulation of ovarian ornithine decarboxylase, C687

secretion  
cAMP effects, pituitary gland, male, E296  
cAMP effects, pituitary gland, female, E290

Gossypol, endothelium-mediated vasodilation and, blood vessels, H234

G-proteins, angiotensin receptor subtypes, renal, F1

Gram-negative infection, glucose kinetics during, diabetes, E123

Granular cell, permeabilizing of, bladder (toad, turtle), F588

Granulocytes, intravascular coagulation, lung changes after, H634

Granulosa cells  
adhesion and differentiation, fibronectin role in, C625  
ovarian, LHRH degradation, E317

GRF: see Growth hormone-releasing hormone

Growth: see also Development; Maturation  
cell, renal, sodium-hydrogen exchanger activity and, C633  
lung  
compensatory, adrenalectomy and, E6  
compensatory, control by adrenal hormones, E343  
muscle, clenbuterol-induced, insulin effects, E370  
renal  
EGF, angiotensin and, F299  
ribosome synthesis in, C506  
stimulation, EGF and, neonatal stage, E251

Growth factor, platelet-derived, glucosamine incorporation, C567

Growth hormone  
fasting effects, pregnancy, E40  
hormones and substrates, during neuromuscular blockade, R687  
pulsatile secretion, feeding relations, R772  
release, GH-releasing factor and somatostatin effects, E508  
secretion, inhibitory effects of TRH, E354

Growth hormone-releasing factor  
CNS action of, inhibition of gastric emptying, G241  
cytosolic free calcium concentration and, anterior pituitary cells, E591  
periodic interactions with somatostatin, GH release and, E508

Growth hormone-releasing hormone, inhibitory effects, growth hormone secretion, E354

GRP: see Peptides, gastrin-releasing

Guanine nucleotide, inhibitory protein, coupling to somatostatin receptors, pancreatic acinar membrane, G308

Guanine nucleotide regulatory proteins, inhibition, epithelial sodium transport, F372

Guanosine, transport, cardiac myocytes, C645

Guanosine diphosphate, obesity, sucrose-induced, R158

Guanosine monophosphate, cyclic accumulation produced by ANF, angiotensin effects, C147

polypeptide vasodilation and, vascular smooth muscle, H1074

Guanylate cyclase, angiotensin effects, aorta, C147

Guanyl cyclase, activation, *E. coli* heat-stable toxin, G775

Gut-liver interaction, glutamine flow, metabolic acidosis, F1069

Gut: see Intestines

## I

Heart  
acidosis effects, catecholamines, newborn, H1441  
adrenergic receptor traffic, ischemia- and agonist-induced changes (guinea pig), H1159  
ANF release, genetic hypertension, H1044  
ATPase isozymes, similarity to brain isozymes, C862  
atrioventricular node  
adenosine and hypoxia effects, adult and neonate, H1192  
response, chronic unilateral vagotomy, H394  
beating, modeling mechanical alternans in, H690  
beat-to-beat model, H680  
blood-perfused, myocardial metabolism and (swine), H1271  
brown fat metabolism, high-fat diet and adrenalectomy effects, E149  
chambers, interaction with thoracic pressure, H1240  
conduction system, angiotensin II binding sites in, H1618  
defibrillation threshold, internal, adrenergic effects on, H500  
denervation, ANP release, neural control of, awake state, F1164  
energetics  
oxygen consumption and pressure-volume area in, H31, H770  
epicardial mapping, ischemic myocardium (pig), H138  
extracellular calcium effects, coronary flow, H1098  
extracellular space, ascorbic acid as a marker, H1305  
failure  
after myocardial infarction, L-thyroxine effects, H341  
ANP transcription with, H1449  
hypertrophy, phospholipid methylation, H8  
hypoxia reoxygenation in, sarcolemmal sodium-calcium exchange, H1026  
intracellular hydrogen and calcium, intercellular communication, C607  
ischemic, carnitine-acylcarnitine translocase, H1557  
mechanics, ventricular interdependence and, H347  
muscarinic potassium current, magnesium ion effects (guinea pig), H210  
myocytes, guanosine transport, C645  
performance, neuropeptide Y and, H1234  
phosphorylation potential and adenosine release, during norepinephrine release (guinea pig), H1184

Heart (continued)

- puridine nucleotide fluorescence, determination of, H856
- Purkinje fibers, twitch tension during calcium overload (sheep), H1540
- quantification of calcium paradox, neonate, H1358
- reperfusion-induced arrhythmias, transient calcium reduction against, H225
- response to metabolic acidosis, factors affecting, H1261
- surgery, electrodes for recording monophasic action potentials, H1315
- sympathetic activity, lactation and, E515
- tissue
  - extracellular calcium, force, and energy in (trout), R838
  - lipid peroxidation in (guinea pig), H1089
- transplantation, atrioventricular nodal accommodation and hysteresis, H1514
- troponin C, calcium binding (cow), C541
- ultrastructure, structure and growth of cardiocytes, neonate, H1391
- vagal tone, apneic asphyxia and, H591
- working
  - contractile function, acidosis effects, H1499
  - degradation of coenzyme A by fatty acids, H41
  - high-energy phosphates in, H1215
  - sepsis-induced depression, diabetes and, H276
  - thyroid state effects, H519
  - xanthine oxidase detection in, H709
- Heart atria
  - fibrillation threshold, acetylcholine release effects, H863
  - pacing, postpacing tachycardia and, H333
  - preferential pathway, conduction block around, H16
  - rapid pacing, endogenous ANP effects, R599
  - sensory receptors, low-salt diet, H133
  - stretched, tunneling cell processes in, H432
- Heart cells: *see also* Cardiocytes; Myocytes; Myocardial cells
  - biochemical and structural changes, metabolic inhibition and, C700
  - calcium measurement in, embryo (chick), C337
  - calcium permeability in, isoproterenol effects, sodium modulation of (chick), C253
  - calcium transients and motion, simultaneous measurement (chick), H1400
  - electrical restitution process, H1018
  - excitation, symmetrical defibrillator waveforms (chick), H1418
  - pH changes in, altered calcium flux and contractile state (chick), C137
  - phorbol ester effects, contractile state and calcium flux (chick), H205
  - potassium current, modulation by protein kinase C and intracellular calcium (guinea pig), H1321
  - sodium-potassium-chloride cotransport, embryo (chick), C721
  - sodium-potassium pump, site density and ouabain binding affinity (chick), C731

- transient inward currents, sodium-calcium exchange, H1330
- young and adult, contractile function, H1484
- Heart-lung preparations, ANF release from, H1044
- Heart rate
  - $\beta$ -adrenergic blockade, obese women, E65
  - ANF effects, fetus (sheep), R561
  - ANP reflex control of, H1136
  - AVP release and, hemorrhage, H1012
  - baroreceptor control of, awake state (monkey), H811
  - cortisol infusion effects, fetus (sheep), R904
  - diurnal patterns of, nonhuman (monkey), R779
  - free diving and (seal), R344
  - glucose kinetics, diabetes, during Gram-negative infection, E123
  - modulation, aging of, H874
  - nervous control of, apneic asphyxia and, H591
  - norepinephrine washout and, myocardium, H1581
  - nucleus ambiguus stimulation effects, R150
  - postpacing tachycardia and, H333
  - sinoatrial denervation, hypoxia and (sheep), H1409
  - temperature effects (snake), R222
  - variability, beat-to-beat model, H680
- Heart ventricles
  - anteroventral third, DOCA-hypertension, skeletal muscle, R396
  - calcium binding, length and cross-bridge attachment effects, C90
  - calcium content, ryanodine effects, C408
  - dysfunction, postischemic, iron and, H1372
  - fibrillation
    - preconditioning of ischemic myocardium and, H1470
    - resistance to, hypothermia and (hedgehog, guinea pig), H1083
    - transient calcium reduction and, H225
    - filling, post-reextension force during relaxation, H256
  - function
    - adaptation to pressure overload, force-interval relations in, H1506
    - after myocardial infarction, thyroxine effects, H341
    - interaction, thoracic pressure, H1240
    - interdependence, chronic pressure overload hypertrophy effects, H347
    - isovolumic pressure waves, quantitative of right and left, H475
    - polyamine biosynthesis, spontaneous hypertension and, H262
    - potentiation of contraction, divalent ions (bullfrog), C52
    - regional segmental dynamics, awake state, H713
    - sodium-calcium exchange, divalent cation effects (bullfrog), C45
    - systolic interdependence, three-element volume elastance model, H1381
- Heart ventricles, left
  - coronary blood flow increase, behaviorally induced, aminophylline effects, H548
  - function, malnutrition effects, H380
  - oxygen consumption, pressure-volume

- area and, H31, H770
- pressure-volume relations, elastance and source resistance, H83
- relaxation time constant, H512
- segmental dynamics, awake state, H713
- Heartworm, arterial dilation, altered endothelial cell-mediated, H1325
- Heat
  - nasal, water exchange and (seal), R883
  - production, skeletal muscle contraction, hypothyroidism, E214
  - shock, lungs and, differences in neonate and adult, C66
  - source, leaky membranes, R1
  - tolerance, adaptation to extreme temperatures (gerbil, mouse), R39
  - transfer, vascular system and, R128
- Hematocrit
  - cardiac output, exercise and (horse), R896
  - reflectance measurements, H147
  - temperature effects (snake), R222
- Hematology, rehydration, vasopressin release (sheep), R640
- Hemoglobin
  - red blood cells and plasma, submersion (turtle), R64
  - reflectance measurements, H147
- Hemorheology, transient flow resistance, rapidly recovered, H919
- Hemorrhage
  - AVP release, heart rate and, H1012
  - gastric injury induced by, G129
  - restitution of blood volume (sheep), R541
  - vasopressin and enkephalin response to, adrenalectomy, R467
  - vasopressin secretion
    - adrenergic mediation of, newborn (pig), R489
    - drinking and, R108
- Henle's loop
  - bicarbonate and ammonia absorption, F277
  - chloride transport, pH effects, F1216
  - renin release, dietary sodium chloride and, F1051
  - thick ascending limb, photolabeling of sodium-potassium-chloride cotransporter, C243
  - urine formation, model, F1020
- Hepatectomy, partial, vagus nerve in liver regeneration, G439
- Hepatic artery, blood flow, adrenoceptors in, H1053
- Hepatic nerves
  - glycogenolysis and blood flow controlled by, arterially and portally perfused liver, E238
  - sodium excretion and cirrhosis, F664
  - low-grade caval constriction, F672
- Hepatocytes
  - adenylate cyclase, aging effects, E277
  - cellular calcium regulation, diltiazem effects, endotoxemic shock, R549
  - intracellular calcium mobilization, during endotoxemic shock, diltiazem effects, R545
  - permeabilized, IP<sub>3</sub>-dependent release, endotoxemic shock and sepsis, E130
  - sodium-potassium-ATPase pumping and solute transport, chlorpromazine effects, G613
- 12-HETE, renal tubular epithelial cells, C277

- Heterothermy, metabolite turnover and (lizard), R77
- Hexamethonium, sensory receptors, efferent renal nerve activity and, F767
- Hexose, uptake, sodium-dependent, LLC-PK<sub>1</sub> cells (pig), C199
- Hibernation  
adipocyte hyperplasia, resistance in high-fat diets (squirrel), R576  
photoperiod effects, castration and (hamster), R337  
protection against hyperplasia, adipocyte (dormouse), R580  
renin and (squirrel), F471  
reproductive hormone secretion (hamster), R329
- Hippocampus, amino acid imbalance, serotonin and feeding responses to, R763
- Histamine  
acid secretion and, G298  
stomach (guinea pig), G601  
calcium release induced by, airway smooth muscle cells, C561  
H<sub>2</sub>-receptor effects, parietal cells, G497  
inhibition, gastric acid secretion (bullfrog), G359  
ion transport, anaphylaxis-induced, G540  
measurement of calcium concentration, tracheal smooth muscle (calf), C817  
modulation, macromolecular permeability (hamster), H1586  
phosphorylation and, parietal cell, G823  
relaxation, coronary artery, H884
- Histidine, peptide, prejunctional inhibition of, G7
- Histone, translational inhibitor, diabetes, muscle, E81
- Histopathology, dystrophic diaphragm (hamster), R275
- HL60 cells, granulocytic differentiation, sodium-hydrogen exchange regulation, C619
- Hormones: *see also* specific hormone  
adenine nucleotide content and, liver mitochondria, newborn, E530  
gut, detection in blood, G477  
spare receptors, drug action and, E114
- Hormonal changes, substrate mobilization and, motor center activity role in, R687
- Hormonal regulation  
gluconeogenesis, proximal tubule cells, F802  
intestinal growth, artificial rearing and, G302  
postprandial thermogenesis, E521
- Hormonal response, dietary protein intake, kidney disease and, F1083
- HSWP cells, sodium-hydrogen exchange, mitogen stimulation of, C219
- Hydrochloric acid, bone resorption, cell-mediated, E90
- Hydrocortisone, compensatory lung growth and, E343
- Hydrocortisone acetate, lung growth, post-pneumonectomy, E6
- Hydrogen  
current transients, bladder (toad), F606  
gradient-driven dipeptide reabsorption, proximal tubules, F448  
intracellular, intercellular communication, C607  
stimulation, cell-mediated bone resorption, E90  
transport, renal papilla collecting cells, F889
- Hydrogen-ATPase  
acid secretion and, colon (guinea pig), G155  
adrenalectomy effects, nephron, F495
- Hydrogen ions  
buffering, proton-induced calcium release, bone, F998  
secretion, acute respiratory acidosis, intercalated cells, F1142  
transport, alkalinity measurement of cellular net acid-base fluxes, C525
- Hydrogen peroxide  
cytotoxicity, gastric mucosal cells, G40  
production, gentamicin enhanced, renal cortical mitochondria, C495
- Hydrogen-potassium-ATPase, acid secretion and, colon (guinea pig), G155
- Hydroperoxides, action potential changes, cardiac tissue (guinea pig), H1089
- DL- $\beta$ -Hydroxybutyrate, malformations induced by, mechanism for, embryo, E72
- Hydroxyl radical  
cytotoxicity, gastric mucosal cells, G40  
gastric mucin interactions, G93
- Hydroxyproline, bone resorption, cell-mediated, E90
- 5-Hydroxytryptamine: *see* Serotonin
- 25-Hydroxyvitamin D<sub>3</sub>: *see* Vitamin D<sub>3</sub>
- Hyperactivity, feeding, sucrose-supplemented, R434
- Hyperbicarbonatemia, acidification, proximal tubules, F89
- Hypercalcemia, chronic, calcium content of sciatic nerve (frog), R655
- Hypercapnia  
hypoxia interaction, cerebral hemodynamics, H890  
metabolic rate and blood flow, cerebral, newborn (pig), H869  
phosphaturia of, dietary inorganic phosphate deprivation, F34  
post-, sodium-hydrogen antiporter in, F833  
ventilation and breathing pattern in (swallow), R854
- Hyperchloremia, renin and angiotensin II release during, plasma lymph, F734
- Hyperemia  
exercise, muscle pump in, H993  
intestinal, experimental diabetes mellitus, G26  
intestinal pressure, resting and passive, determinants of, G587  
oxygen reactivity, arteriolar (hamster), H1120  
reactive, brief diastolic occlusion, metabolic mediation of, H25  
regional, splanchnic and renal responses to glucagon, F1105
- Hyperglucagonemia, insulin deficiency, protein catabolism and, E208
- Hyperglycemia  
adaptation of glucose transport, intestinal, G54  
carbohydrate oxidation and, E376  
hyperinsulinemia and, glucose utilization and, tissue, fetus, E616
- Hyperinsulinemia, hyperglycemia and, glucose utilization and, tissue, fetus, E616
- Hyperosmolality  
acute, volume regulation during, brain, F522  
cerebrospinal fluid flow in response to, brain, F538  
volume regulatory influx during, electrolytes from plasma to brain, F530
- Hyperoxia  
lactate metabolism and, muscle, C263  
superoxide dismutase induction, lung, neonate and adult, C66
- Hyperperfusion, coronary, myocardial metabolism and (swine), H1271
- Hyperplasia  
adipocyte  
protection in hibernators (dormouse), R580  
resistance in high-fat diets (squirrel), R576
- Hypertension  
acute resetting, arterial baroreflexes, H974  
after coronary occlusion, chronic hypertension with left ventricular hypertrophy, H1148  
brachial artery changes, wrist occlusion and, men, H217  
cerebral, hypoxia and, blood flow autoregulation during (lamb), H1342  
chronic, endothelium-dependent dilatation, cerebral arterioles, H1435  
developmental and established phases of, ANF in, H1623
- DOCA  
aortic constriction and renal denervation effects (swine), F1223  
catecholamine levels and, erythrocytes, H270  
skeletal muscle, R396
- DOC-salt, arginine vasopressin role in, F952
- elevated renal nerve activity, spinal transection, R619
- fetal, suprarenal aortic flow reductions and (lamb), H838
- genetic, ANF release, heart, H1044
- Goldblatt  
ANF in, H1623  
vascular reactivity to U 46619 and adrenergic agonists, renal, H1523
- Grollman, sympathetic nerve effects on developing cardiac hypertrophy, H818
- intrahepatic, sodium excretion and, low-grade caval constriction, F672
- length-dependent sensitivity and, vascular smooth muscle, H402
- microvasculature of, alterations in, H933
- monoamine turnover, pain sensitivity and thermal capability in, R910
- norepinephrine- or angiotensin II-induced, cerebral blood flow response to, H47
- portal, urinary sodium excretion and, cirrhosis, F664
- pulmonary  
after acute hypoxia, fetal (sheep), H941  
eicosanoids in, neonate (lamb), H626  
reflex bradycardia and, cardiovascular sympathetic afferent fibers, H787
- renal  
carotid baroreceptor response to, R568  
splanchnic circulatory changes during, G146

Hypertension (*continued*)

- spontaneous
  - adrenoceptor distribution in myocardium, H904
  - altered polyamine biosynthesis, cardiac, H262
  - atrioventricular III effects, mesenteric resistance vessels, H1612
  - calcium and vitamin D metabolism in, F712
  - cyclosporin effects, H1596
  - dietary calcium and, R501
  - hemodynamic regulation in, H176
  - maternal influences, H980
  - noradrenergic neurotransmission, adenosine role in, H909
  - sucrose-supplemented feeding and, R434
- vasoconstrictor and vasodilator sites, anteroventral third ventricle region, R827
- Hypertrophy
  - cardiac
    - ANF release, H1044
    - contraction in growth of cardiocytes and, neonate, H1391
    - developing, sympathetic nerve role in, hypertension, H818
    - phospholipid methylation in, H8
    - polyamine biosynthesis and, H262
    - chronic pressure overload, ventricular interdependence and, H347
    - experimental aortic insufficiency, H1005
    - intracellular adrenoceptor distribution, myocardium, H904
    - left ventricular, chronic hypertension with, after coronary occlusion, H1148
  - renal
    - aging, awake state, R555
    - uninephrectomy and dietary protein effects, F222
  - vascular, U 46619 and adrenergic agonists, renal vascular reactivity to, H1523
  - vitamin D<sub>3</sub> effects and, cardiovascular function, E675
- Hypocalcemia
  - chronic, calcium content of sciatic nerve (frog), R655
  - modulation of renal response, acute volume expansion, F726
- Hypoglycemia
  - cerebral blood flow,  $\beta$ -receptor-mediated increase in, H949
  - interleukin 1 effects, R794
  - osmoregulation, control of vasopressin secretion and, R671
- Hypoperfusion, pulmonary, after acute hypoxia, fetal (sheep), H941
- Hypotension
  - endotoxemia and, cerebral blood flow (pig), H956
  - hemorrhagic, central opioid cardiovascular control in, H507
  - vasopressin secretion, adrenergic mediation of, newborn (pig), R489
- Hypothalamo-neurohypophyseal system, inhibition of vasopressin and oxytocin, water and opioid peptides, R31
- Hypothalamus
  - DOCA-hypertension, skeletal muscle, R396

- growth hormone secretion, TRH inhibition of, E354
- heating effects, fever and (sheep), R868
- lateral, lesion, cortical control of thermogenesis induced by, R626
- oxytocinergic cells in, activation by cholecystokinin and gastric distension, R661
- serotonergic pathways and, regulation of renin secretion, R179
- stimulation effects, adrenal nerve activity, R418
- thermoregulation and analgesia, hypertension effects, R910
- ventromedial, lesions, obesity following, R523
- Hypothermia
  - glucose kinetics, pentobarbital anesthesia and, E657
  - induced, monophasic action potentials during (hedgehog, guinea pig), H1083
  - metabolic rate and blood flow, cerebral, newborn (pig), H869
- Hypothyroidism
  - glomerular dynamics, renin-angiotensin system and, F170
  - heat production and, skeletal muscle contraction, E214
  - renal tubules, cellular action of vasopressin, F104
  - respiration and, perfused hearts, H519
- Hypoventilation, dystrophic diaphragm (hamster), R275
- Hypovolemia, inhibition of vasopressin and oxytocin by water, opioid peptides in, R31
- Hypoxia
  - action potential duration and, ventricular muscle, during energy block, H373
  - acute, pulmonary hypoperfusion after, fetal (sheep), H941
  - adenosine and, atrioventricular node, adult and neonate, H1192
  - apneic tachycardia, low control heart rate, H591
  - arterial, intestinal vascular response to, denervation effects, newborn (swine), G201
  - blood volume decrease during, catecholamines and, fetus (sheep), H927
  - endothelial cells, different vascular beds, H878
  - graded, fluorescence determination, heart, H856
  - heart, sarcolemmal sodium-calcium exchange, H1026
  - hypercapnia interaction, cerebral hemodynamics, H890
  - intracranial hypertension, cerebral blood flow during (lamb), H1342
  - oxygen reactivity, arteriolar (hamster), H1120
  - salt-perfused lungs, dexamethasone effects, H574
  - theophylline effects, adenosine regulation of cerebral blood flow, H165
  - ventilation and breathing pattern in (swallow), R854
  - visceral afferents and, H556
- Hysteresis, accommodation and, atrioventricular node, transplantation effects, H1514

I

      - sympathetic control of, G726
    - absorptive cell tight junctions, cytoskeleton and, C171
    - adaptation, dietary carbohydrate (trout), G489
    - bile salt absorption (killifish), G730
    - biotin transport, sodium gradient-dependent, G631
    - brain interactions, G369
    - capillary filtration, experimental diabetes mellitus, G20
    - contraction, control, field stimulation and motilin, G189
    - epithelium, SITS-sensitive chloride conductance pathway, C693
    - factors, insulin extraction and, liver, E603
    - glucose transport, rapid adaptation of, G54
  - growth
    - enhancement by epidermal growth factor in milk, neonates, G662
    - hormonal regulation of, artificial rearing and, G802
  - hyperemia, experimental diabetes mellitus, G26
  - lactate production, type A hypoxic lactic acidosis, E271
  - lipid metabolism, chloroquine effects, G673
  - microvasculature, oxygen-mediated ischemic injury, G49
  - peristalsis
    - regulation by opioid neurons, G226
    - somatostatin neurons in, G434
  - reperfusion injury, neutrophils and, H699
  - resting and passive pressure, determinants of, G587
  - secretion, *E. coli* heat-stable toxin and, G775
  - smooth muscle cells, substance P receptors for (guinea pig), G666
  - tight junction, structure and permeability, alteration by cytoskeleton, C854
  - transit, acoustic and cold stress effects, G124
  - transport, cardiac receptor modulation of, G116
  - tyrosine transport, sodium-potassium-chloride interaction (flounder), R264
  - vascular response to arterial hypoxia, denervation effects, newborn (swine), G201
- Inulin
    - blood-brain barrier permeability, after osmotic opening, R459
    - clearance, renal effects, F244
    - extracellular space marker, heart, H1305
    - iodide, transport, thyroid, autoregulation and, E165
    - Iodine, metabolism, thyroid, autoregulation, E165
    - Iodoantipyrine, <sup>14</sup>C-labeled, microsphere blood flow estimates and, brain, H1289
  - Iodocyanopindolol
    - <sup>3</sup>H-labeled
      - binding, proximal tubules, F848
      - renal cortical adrenergic receptors, adrenal medullary regulation, F1063
  - 2-Iododesmethylimipramine, microsphere deposition comparison, myocardial flow distributions, F184
  - Ion channels, chloride transport, cortical and outer medullary collecting duct, F203
  - Ionomycin, cytoplasmic free calcium and, alveolar type II endothelial cells, C679
  - Ionophore A23187
    - basolateral potassium conductance, corneal epithelium (frog), C555
    - lutinizing hormone hyposecretion and, pituitary cells, aging and, E233
    - phorbol esters and, chloride secretion, tracheal epithelium, C828
  - Ions
    - brain, regulation during acute hyperosmolality, F522
    - intestinal transport, transepithelial, ileum, G737

## Ions (continued)

- intracellular, ouabain binding effects, ventral skin (tadpole), R402
- movement, colonic, nitrite effects, G246
- transport
  - aldosterone-induced, amiloride-inhibitable, ileum (chicken), G211
  - anaphylaxis-induced, small intestine, G540
  - epithelial tissues, C177
  - kidney tubules, NMR, F904
  - muscarinic receptors and, ileum (guinea pig), G323
  - short-chain fatty acid effects, cecum, G171
  - stimulation by VIP, salt gland (duck), R801

## Iron

- deficiency, glucose dependence and, E461
- gastric mucin interactions, G93
- ventricular dysfunction and, postischemic, H1372
- Irritable bowel syndrome, CCK-8, gallbladder sensitivity to, G650

## Ischemia

- ambient oxygen effects, endothelial cells, vascular beds, H878
- ATP, inosine preservation of, H1224
- cardiac, carnitine-acylcarnitine translocase in, H1557
- cerebral, endogenous opioids and, E565
- gastric injury induced by, G129
- high-energy phosphates, working hearts, H1215
- microvascular injury induced by, neutrophils in, H699
- myocardial
  - arachidonic acid distribution and, C846
  - coronary vasodilator reserve during (pig), H422
  - denervated, epicardial mapping in (pig), H138
  - hypertension and, H1148
  - metabolic correlates, H412
  - transmural anoxic wave front in, H240
- peripheral nerve response, E349
- renal, short, oxygen metabolite reperfusion injury and, F685
- transient calcium reduction, protective effect of, heart, H225
- warm, insulin disposition and, kidney, F884

## Ischemic injury, oxygen-mediated, intestinal microvasculature, G49

## Isochronal curves, cardiac muscle, H645

## Isoleucine, infusion, leucine metabolism and, E428

## Isometric force, decay, heart muscle, H256

## Isometric, muscle contraction, forced elongation and, C484

## Isoprenaline, respiratory stimulation and, brown fat cells (hamster), C301

## Isoproterenol

- adrenergic effect, internal cardiac defibrillation threshold, H500
- $\beta$ -adrenergic relaxation, smooth muscle (toad), C369
- $\beta$ -adrenoceptors, cAMP-generating system and, colon, G378
- calcium permeability and, sodium modulation of, heart cells (chick), 253
- contractile function and, young and adult heart cells, H1484

## cytosolic free calcium and, parotid acini, G290

## malnutrition effects, left ventricular function, H380

## modulation, macromolecular permeability (hamster), H1586

## potassium depletion effects, collecting tubule, F408

## potassium uptake and, myocardium (pig), H799

## sweat secretion, VIP-induced (monkey), R935

## synergism, agonist combinations in peptinogen secretion (frog), G557

## Isotopes

- radioactive
  - leucine and  $\alpha$ -ketoisocaproate, amino acid infusion effects, E428
  - models for kinetic data, E551
  - stable, leucine metabolism, newborn, E608

## Isozymes

- cardiac ATPase, brain isozyme similarity, C862
- myosin, diabetes and, skeletal muscle, E395

## J

## Jejunum

- alterations in myoelectric activity, MPTP and, G809
- blood flow and fluid transport, cardiac receptor modulation of, G116
- brush-border membrane vesicles, sodium gradient-dependent transport for biotin, G631
- heavy metal absorption, kinetics of, G134
- ion transport, anaphylaxis-induced, G540
- isografts, hormonal regulation of intestinal growth, G802

## Jet lag, benzodiazepine effects (hamster), R204

## Jugular vein, salt intake, hepatic control of, R444

## Junction

- esophagogastric, calcium influx effects, G760

## gap

- epithelial reorganization and (pig), C329
- intercellular communication, C607
- gastroesophageal, responses to abdominal pressure, G315

## tight

- calcium activity, gallbladder, C309
- epithelial, structure and function, C749
- intestinal, alteration of structure and permeability by cytoskeleton, C854
- intestinal absorptive cell, cytoskeleton and, C171
- osmotic water flow and, proximal tubules, F1091

## K

## Kaliuresis, regulatory factors, F1182

## Kallikrein-kinin system, aprotinin effects, obstructive nephrectomy, F1006

 $\alpha$ -Ketoisocaproate

- infusion, sample site selection for tracer studies, E173
- metabolism, skeletal muscle during con-

## tractions, E636

## Ketone body

- kinetics, stable isotope tracer studies, E551
- turnover, tracer study, E496
- 6-Ketoprostaglandin  $F_{1\alpha}$ , pulmonary epithelial cells, endotoxin-treated (pig), C384

## Kidney

- ANF binding and functional effects, F917
- autoregulation, pressure natriuresis and, ANF-induced diuresis, F424
- basolateral and brush-border membrane succinate and citrate transport in, F432
- TEA transport, F1040
- blood flow: see Blood flow
- calcium excretion, spontaneous hypertension, F712
- cells: see Kidney cells
- collecting duct
  - band 3-like anion exchanger in, F213
  - cell populations in, C323
  - postnatal maturation, F622
  - transport functions, F1302
- comparative physiology, micropuncture study of proximal tubule pH (starling), R587
- compensatory hypertrophy, ribosome synthesis during, C506
- cortex: see Kidney cortex
- cyclooxygenase inhibition, pregnancy and, F158
- denervation, DOCA-hypertension and (swine), F1223
- distribution of meprin, high and low activity, C535
- eicosanoid synthesis, pregnancy, F1197
- endotoxin-induced insufficiency, platelet-activating factor and, F1283
- failure
  - calcitriol production in, F1015
  - insulin disposition and, F884
  - uninephrectomy and dietary protein effects, F222
- function
  - aging, awake state, R555
  - endotoxin and, F244
  - epoxides and vasopressin, bladder (toad), F464
  - head-out water immersion and, awake state, R242
  - glomerulus: see Kidney glomerulus
  - gluconeogenesis, glycolysis and (chicken), R679
  - D-glucose transport, sodium-dependent (pig), F151
  - glycoprotein, cell surface distribution, C433
- hemodynamics
  - aprotinin effects after obstructive nephrectomy, F1006
  - intraportal infusion of glucagon, F1105
- hydronephrotic, calcium antagonists in dilation of preglomerular vessels, F1157
- hypertension, splanchnic circulatory changes during, G146
- hypertrophy: see Hypertrophy
- limited capacity for vasodilation, diabetes and, H845
- luminal membrane vesicles, cimetidine transport, F141
- meat meal effects, protein-restricted diet

Kidney tubules (*continued*)

- improved separation method, F358
- insulin stimulation of ammoniogenesis in, F1171
- lithium during low salt intake and diuresis, F188
- lysosome distribution and cathepsin activity, F1290
- measurement of flow rate, F366
- organic cation secretion in (flounder), R861
- PAH coupling to sodium, F795
- pH, micropuncture study (starling), R587
- proline cotransport, F15
- $\beta$ -receptor stimulation, electrophysiological analysis (salamander), F636
- reflection coefficient, basolateral sodium chloride in, F290
- renin distribution, E621
- sodium bicarbonate cotransport across basolateral membrane (mud puppy), F340
- sodium-dependent glucose transport (pig), F151
- sodium-hydrogen antiporter in posthypercapnia, F833
- sodium-potassium-ATPase stoichiometry, C126
- solute and water absorption in, F563
- stretch-activated potassium channels, F1253
- succinate and citrate transport in, F432
- ultrastructure, flow rate effects, F582
- proximal convoluted
  - acidic compartments in, F95
  - bicarbonate transport in, F912
  - chronic metabolic alkalosis, acidification and, F89
- proximal straight
  - control of steady-state pH, F282
  - NAD dynamics, F269
  - uninephrectomy and dietary protein effects, fluid absorption, F222
  - segments, prostaglandin actions, F377
  - vasopressin effects, urea and water transport, F823
- Kinins, cerebroventricular, cardiovascular function and, R137
- Kupffer cell, renin distribution, exogenously administered, kidney, E621

L

- Lacrimal gland, protein secretion, newly synthesized, C514
- Lactate
  - blood, insulin effects, adrenomedullated exercising rats, R535
  - concentration, pentobarbital anesthesia and, E657
  - infusion, sample site selection for tracer studies, E173
  - kinetics
    - diabetes, during Gram-negative infection, E123
    - exercise and (horse), R890
    - resting and iron deficiency, E461
  - metabolism
    - hyperoxia and, muscle, C263
    - tachycardia and myocardial ischemia (pig), H422

- muscle, active postexercise recovery, E305
- muscle hypoperfusion, during exercise, H1199
- postnatal changes, oxygen transport and cardiac output (lamb), H100
- production
  - from glucose, food restriction effects, adipocytes, E336
  - measurement of, E472
  - muscle, E271
  - papillary collecting duct cells, F251
  - phosphocreatine elevation and, aorta, H461
- turnover

**fast-twitch, ATP turnover in (trout), R186**

Muscle, skeletal (*continued*)  
 fluid exchange, viscoelastic blood vessels, H1548  
 glucose transport, insulin and contraction effects, E12  
 hypothalamus and sodium-potassium pump activity, DOCA-hypertension, R396  
 iron-deficient, increase in mitochondrial matrix enzymes, C639  
 isolated cells, physiological model, C349  
 microvascular response, angiotensin II, H1573  
 mitochondrial protein synthesis in, effects of inhibition, C866  
 myofibrillar proteolysis, dietary regulation, E52  
 3-O-methylglucose transport, bacteremia and, R55  
 protein balance, interleukin 1 and tumor necrosis factor effects, C766  
 solvent drag reflection coefficient, integral-mass balance method, H194

Muscle, smooth  
 active, stiffness during forced elongation, C484  
 $\beta$ -adrenergic relaxation of, sodium dependence (toad), C369  
 airway, adenylate cyclase in, muscarinic cholinergic inhibition, C97  
 anal sphincter, sacral nerve influence on (opossum), G345  
 aortic, sodium-hydrogen antiport, C193  
 arteriolar bifurcations, coordinated diameter oscillations at, H568  
 contraction, spare receptors, drug action, E114  
 coronary, relaxation, electrical stimulation, H884  
 esophageal, calcium influx effects, G760  
 intestinal circular, somatostatin neurons and, G434  
 isolated cells, physiological model, C349  
 jejunal, mechanical properties, after myenteric plexus ablation, G745  
 tracheal, measurement of calcium concentration (calf), C817

vascular  
 cholinergic vasodilation, H1253  
 endothelium-dependent relaxation, bradykinin and VIP, H1074  
 force-length dependence (swine), H1141  
 length-dependent sensitivity, hypertension and, H402  
 modulation of sensitivity, eicosanoid synthesis inhibition and, H1492  
 phosphocreatine elevation and, aorta, H461

Muscle cells  
 aortic smooth, disruption of actin microfilament, C71  
 colonic smooth  
 cAMP-generating system, G378  
 QNB binding and contraction in, G656  
 intestinal smooth, substance P receptors for (guinea pig), G666  
 isolated, physiological model, C349

smooth  
 airway, histamine-induced calcium release, C561  
 functional, angiotensin II interaction, C872  
 regulation of ANP receptors on, C809

vascular

calcium signals (ferret), H1456  
 depolarization and activation, renal arteries, F778

Muscle fiber  
 diaphragm, mechanical properties, C210  
 force-dependent component, calcium binding to cardiac troponin C (cow), C541  
 tonic, tension, extracellular calcium and, C375  
 tonus, mechanics of (frog), C599

types  
 ATP depletion, C426  
 glucose transport, insulin and contraction effects, E12  
 leucine metabolism, E636  
 leucine metabolism, endurance training effects, E648  
 transformation, calcium concentration and, C296

Myenteric plexus  
 ablation, mechanical properties of jejunal smooth muscle after, G745  
 cAMP-mediated cholinergic transmission, somatostatin effects, G607  
 dopamine levels, MPTP and, jejunal myoelectric activity, G809  
 peristalsis, somatostatin neurons in, G434

Myocardial cells: *see also* Cardiocytes; Heart cells; Myocytes  
 microlesion formation, shock effects, H480

Myocardium  
 adaptation, chronic propranolol therapy, H444  
 arachidonic acid distribution in, C846  
 calcium loss, lanthanum, manganese, and nickel effects, (bullfrog), C45  
 cation transport in, diabetic cardiomyopathy, E202  
 coenzyme A levels, degradation by fatty acids, H41  
 contraction, magnesium and, H248  
 depression, *E. coli* sepsis-induced, diabetes and, H276  
 development of coronary collateral circulation (swine), H1271  
 frequency-dependent depression, verapamil and, awake state, H487

function  
 intracellular acidosis effects, H1499  
 metabolic correlates of, H412  
 regional, iron in, H1372

infarction: *see* Infarction

innervation, left circumflex Ameroid constrictor placement effects (swine), H1425

intracellular adrenoceptor distribution, spontaneous hypertension, H904

ischemic  
 preconditioning of, arrhythmias and, H1470  
 segment shortening at margin, H826  
 substrate use in, H107

metabolism  
 coronary flow relations, H1098  
 coronary hyperperfusion and (swine), H1271  
 norepinephrine washout from, increased heart rate effects, H1581  
 potassium uptake, during  $\alpha$ - and  $\beta$ -adrenoceptor stimulation (pig), H799  
 potentiation of contraction, divalent cations (bullfrog), C52

regional flow, microsphere depositions in, H184  
 respiration, thyroid state effects, H519  
 response to metabolic acidosis, factors affecting, H1261

Myocytes: *see also* Cardiocytes; Heart cells; Myocardial cells  
 guanosine transport, C645  
 tunneling cell processes in, stretched atria, H432  
 ventricular and vascular, calcium and potassium currents in, calmodulin antagonist effects, H1601

Myoelectric activity, alterations due to MPTP, jejunum, G809

Myofibrils  
 cardiac, creatine kinase in, C444  
 developing cardiac hypertrophy, sympathetic nerve effects, hypertension and, H818

Myoglobin  
 inhibition of protein synthesis, skeletal muscle mitochondria, C866  
 quantification, heart, neonate, H1358

Myomesin, marker, fiber types, C456

Myometrium, desensitization, ritodrine infusion and, E410

Myosin, composition, heart muscle, with aortic insufficiency, H1005

Myosin adenosine triphosphatase, activity, chronic propranolol therapy, H444

Myosin enzyme, composition, heart failure, after myocardial infarction, H341

# N

NAD: *see* Nicotinamide adenine dinucleotide

Naloxone  
 activation, field stimulation and motilin, small intestine, G189  
 mechanism of action, small intestine and stomach, G179  
 regional cerebral perfusion and, endotoxin shock, awake state, R425  
 regulation, intestinal peristalsis, G226  
 vasopressin and oxytocin release, reduced by water, R31

NAP-taurine, interactions, erythrocyte anion exchange system, C652

Natriuresis  
 atrial natriuretic factor-induced, renal perfusion pressure effects, F234  
 atrial peptide-induced, modulatory role of angiotensin II, F880  
 rapid atrial pacing, endogenous ANP released by, R599  
 solute gradients and, renal medullary, F679  
 volume, ANF in, F1129  
 volume expansion, atrial appendectomy, R786

Natriuretic factor  
 cAMP-mediated fluid secretion, Malpighian tubules (mosquito), R701  
 prestegane B, R375

Nausea, osmoregulation, control of vasopressin secretion and, R671

Neonate: *see also* Newborn  
 atrioventricular node, adenosine and hypoxia effects, H1192  
 cardiac output, impedance cardiography, H1298  
 cardiocytes, contraction effects on structure and growth, H1391

- enhancement of quiet sleep, muramyl dipeptide and, R646  
epidermal growth factor, growth-promoting activity of, E251  
intestinal growth, enhancement by epidermal growth factor in milk, G662  
lung, induction of superoxide dismutase, C66  
quantification of calcium paradox, heart, H1358  
Neovascular body, glomuslike, vagal reception of somatostatin, pancreas, R200  
Nephritis, Heymann, dietary protein and converting enzyme inhibition in, F719  
Nephron  
cortical segments, NAD dynamics, F269  
distal  
glycoprotein, cell surface distribution, C433  
potassium-ATPase activity, F418  
hydrogen-ATPase, adrenalectomy effects, F495  
Nephropathy  
kaliopenic, prostaglandins and urinary concentrating defect in, F1113  
obstructive, aprotinin and, F1006  
Nephrosis, dietary protein, glomerular size selectivity and, F318  
Neural control, ANP release, awake state, F1164  
Neurohypophysial hormones, inhibition by water, opioid peptides and, R31  
Neurohypophysis, oxytocinergic cells in, activation by cholecystokinin and gastric distension, R661  
Neurons  
central noradrenergic, AVP release and heart rate, during hemorrhage, H1012  
cholinergic, acid secretion and, stomach (guinea pig), G601  
depressor, caudal ventrolateral medulla, H777  
enteric, regulation of gastrin secretion, gastric antral mucosa, G721  
esophagus plexus submucosus, substance P binding sites, R167  
medullary respiratory, discharge, pulmonary vagal afferent control of, R809  
opioid, regulation of peristalsis and, intestinal, G226  
reticular, corticosterone effects, R25  
somatostatin, role in intestinal peristalsis, G434  
Neuropeptides  
gastrin-releasing, nerves, control of antral gastrin secretion (pig), G767  
gastrin secretion and, antrum (pig), G643  
Neuropeptide Y  
food intake and, R516  
systemic hemodynamics, cardiac performance and, H1234  
Neurotensin  
differential effects, muscle, ileum, G566  
release, somatostatin and muscarinic inhibition, G684  
Neurotransmission, noradrenergic, adenosine role in, spontaneous hypertension, H909  
Neurotransmitter  
metabolism, pulmonary artery, H66  
noradrenergic inhibitory, internal anal sphincter (opossum), G345  
quantal release of, black widow spider venom, C469  
release, prejunctional inhibition of (guinea pig), G7  
somatostatin, intestinal peristalsis and, G434  
Neutrophils  
microvascular injury, ischemia-reperfusion-induced, H699  
migration, ambient oxygen and, vascular beds, H878  
Newborn: *see also* Neonate  
acidosis effects, catecholamines, heart, H1441  
hypertension in hypoxia, cerebral blood flow autoregulation (lamb), H1342  
hypothermia effects, cerebral metabolic rate and blood flow (pig), H869  
leucine metabolism, E608  
liver mitochondria, adenine nucleotide content, E530  
vascular response to arterial hypoxia, intestinal denervation effects (swine), G201  
vasopressin secretion, adrenergic mediation of (pig), R489  
Nickel  
calcium loss and, ventricle (bullfrog), C45  
potentiation of contraction, ventricle strips (bullfrog), C52  
protein, pertussis toxin and, pituitary tumor cells, E28  
Nicotinamide, dietary phosphate effects and, cortical nephron segments, F269  
Nicotinamide adenine dinucleotide dynamics, cortical nephron segments, F269  
transmural anoxic wave front, early ischemia, H240  
Nicotine, sensitivity, vagotomy and, H394  
Nifedipine  
frequency-dependent myocardial depression induced by, awake state, H487  
isoproterenol effects and, calcium permeability in heart cells (chick), C253  
preferential coronary vasodilation and, H604  
NIP-taurine, interactions, erythrocyte anion exchange system, C652  
Nitrate reductase, nitrite effects, colon, G246  
Nitrendipine, preferential coronary vasodilation and, H604  
Nitrite  
inhibition, gastric acid secretion (bullfrog), G359  
luminal or circulating, colonic ion movement and, G246  
Nitrogen, amino acid metabolism, kidney cells, F1243  
Nitroprusside, cerebrospinal fluid kinin and, R137  
NMR: *see* Nuclear magnetic resonance  
Nonelectrolytes, entry, inner ear fluid, F50  
Norepinephrine  
adrenergic stimulation of sodium absorption and, kidney, F810  
baroreflex buffering, awake state, H728  
blood volume decrease and, acute hypoxia, fetus (sheep), H927  
cerebrospinal fluid, cardiovascular function and, R137  
conjugated, pulmonary artery, H66  
dose-response relations, myocardial adaptation to, H444  
endotoxemia, hypotension effects on cerebral blood flow and (pig), H956  
erythrocyte levels, DOCA-salt hypertension, H270  
hormones and substrates, during neuromuscular blockade, R687  
hypertension, cerebral blood flow response to, H47  
infusion, phosphorylation potential and adenosine release, heart (guinea pig), H1184  
intracranial injection, regulated temperature after (goldfish), R821  
levels, glucose-induced, obesity resistance and, R475  
neuropeptide Y correlation, cardiac performance, H1234  
noradrenergic neurotransmission, spontaneous hypertension, H909  
postpacing tachycardia and, H333  
release, prostaglandin role in, kidney, F929  
respiratory stimulation and, brown fat cells (hamster), C301  
thermogenesis and, postprandial, E521  
turnover  
high-fat diet and adrenalectomy effects, E149  
lactation and, brown fat, E515  
uptake, neuronal, age-related changes, H1566  
vascular resistance and, coronary collateral circulation, H582  
washout, from normal myocardium, heart rate effects, H1581  
Nuclear magnetic resonance  
high-energy phosphates, working heart, H1215  
inosine, preservation of ATP, during ischemia, H1224  
intracellular acidosis effects, contractile function, working heart, H1499  
intracellular sodium, kidney tubules, F904  
phosphorus, red blood cells and plasma, submersion (turtle), R64  
sodium, stoichiometry, C126  
Nucleosides, transport, cardiac myocytes, C645  
5'-Nucleotidase, ATP depletion, slow-twitch red muscle, C426  
Nucleotides  
adenine, mitochondrial content, liver, newborn, E530  
guanine, thermogenesis in dietary obesity, model, R756  
metabolism, cardiac myocytes, C645  
pyridine, determination of fluorescence, heart, H856  
Nucleus, hypothalamic, adrenal nerve activity and, R418  
Nucleus ambiguus, stimulation, atrial and ventricular rates and, R150  
Nucleus medianus, anteroventral third ventricle, vasoconstrictor and vasodilator sites in, R827  
Nucleus solitarius, neuronal response, substance P, G369  
Nutrients  
intestinal, emptying of liquids, imaging of, G79  
intravenous, thermogenesis induced by, obesity, E65

Nutrition: *see also* Feeding  
parenteral, glucose-based, energy expenditure after, E135  
Nystatin, cellular sodium with, ionic dependence, F26

O

Obesity

adipocyte hyperplasia, resistance in high-fat diets (squirrel), R576  
blood flow, adipocytes, R228  
diabetes and, glucose transport and antilipolysis, E300  
dietary, brown fat thermogenesis in, model, R756  
dynamic and static phases, VMH and PVN lesions, R523  
food intake, neuropeptide Y effects, R516  
resistance to, glucose-induced norepinephrine levels and, R475  
sucrose-induced, diet effects, R158  
thermogenesis,  $\beta$ -adrenergic blockade and intravenous nutrient-induced, E65

women, fasting-mediated studies on insulin action, E193

9-Octadecenoic acid isomers, intestinal absorption, G751

Octapeptide, gastric distension and, activation of oxytocinergic cells, hypothalamus, R661

Oleic acid

absorption, intestinal, G751  
exocrine insufficiency, endocrine pancreas in, G139

Oligomycin, respiratory stimulation and, brown fat cells (hamster), C301

Opiates

activity,  $\beta$ -casomorphins passage and, ileum, G737  
exogenous, mechanism of action in small intestine and stomach, G179  
exogenous excitatory pathways, activation by field stimulation and motilin, small intestine, G189

Opioids

central cardiovascular control, hemorrhagic hypotension, H507  
endogenous, traumatic brain injury and, E565  
giant migrating contractions, small intestine, G697  
regional cerebral blood flow and, endotoxin shock, awake state, R425

Optical measuring techniques, sodium chloride, basolateral reflection coefficient, F290

Organum vasculosum laminae terminalis vasoconstrictor and vasodilator sites in, R827  
vasopressin secretion, drinking and, R108

Ornithine decarboxylase

activity  
digestive tract mucosa, G303  
gastric damage relations, G1  
ovarian, regulation by human chorionic gonadotrophin, C687  
spontaneous hypertension effects, heart, H262

Oryctolagus cuniculus, circadian rhythms, during restrictive feeding, R46

Osmolality

blood volume restitution, after hemorrhage (sheep), R541  
urinary, cellular action of vasopressin, F104

Osmoregulation

antidiuretic hormone and angiotensin II, CSF and plasma (duck), R285  
cerebrospinal fluid flow, acute hyperosmolality and, F538  
control of vasopressin secretion and, healthy humans, R671  
high sodium chloride and, renal cells, C230  
plasma to brain, during acute hyperosmolality, F530  
water and electrolytes, during acute hyperosmolality, brain, F522

Osmotic shock: *see* Shock

Osteoblastlike cells, calcium elevation, parathyroid hormone and, E45

Osteoclasts

bone resorption, hydrogen-stimulated, E90  
carbonic anhydrase activity of, PTH effects (chick), E670

Oubain

acid secretion and, colon (guinea pig), G155  
binding, ventral skin (tadpole), R402, R410  
binding affinity, sodium-potassium pump, heart cells (chick), C731  
calcium transport, bladder (turtle), R917  
cellular sodium with, ionic dependence, F26  
gluconeogenesis and, kidney (chicken), R679  
respiratory stimulation and, brown fat cells (hamster), C301  
sodium fluxes, giant axon (squid), C547

Quabain-resistant mutant, rescue of MDCK cell, C151

Ovarian hormones, energy balance, exercise effects, R740

Ovariectomy, exercise effects, energy balance, R740

Oxalate

canalicular transport, liver plasma membrane vesicles, G461  
chloride transport, renal microvillus membranes, F513

Oxidation

$\beta$ -, liver content, weaning, E536  
leucine  
newborn, E608  
skeletal muscle during contractions, E636  
skeletal muscle in endurance training, E648  
plasma free fatty acids, model, R746

Oxygen

ambient, cultured endothelial cells from different vascular beds, H878  
arteriovenous difference, temperature effects (snake), R222  
consumption  
brain, MCA occlusion and, H454  
cardiac output and, exercise (horse), R896  
cerebral, hypoxia and hypercapnia interaction effects, H890  
cortical control of, R626  
extracellular calcium and, heart, H1098

gill and red cell carbonic anhydrase role in (shark), R450

maximal, exercise hyperemia, skeletal muscle, H993

maximal, insulin action and, E489  
mitochondrial, aerobic recovery of cardiac muscle, H325

myocardial,  $\alpha$ - and  $\beta$ -adrenoceptor stimulation (pig), H799

myocardial, behaviorally induced increases, aminophylline effects, H548

myocardial, coronary hyperperfusion and (swine), H1271

myocardial, tachycardia and (pig), H422

papillary collecting duct cells, F251  
phosphocreatine elevation and, aorta, H461

pressure-volume area and, left ventricular, H770

pressure-volume area relations, heart, H31

sodium-potassium-ATPase and, MDCK cells, C269

temperature effects (snake), R222  
work and efficiency with, muscle (frog, rat), C22

delivery, inadequate, muscle pressor reflexes and, H1199

dependence, mitochondrial, kidney, F440

equilibrium curve, red blood cells and plasma, submersion (turtle), R64

flux, high-altitude adaptation and (llama), R298

ischemic injury mediated by, intestinal microvasculature, G49

metabolites

reactive, microvascular injury, H699  
renal injury and, F692

reperfusion injury and, after short renal ischemia, F685

oximetry, fiber-optic reflectance, H147  
peripheral nerve, exsanguination and, E349

radicals, gallbladder glycoprotein secretion and (guinea pig), G627

reactivity, arteriolar (hamster), H1120  
toxicity, lung, differences in neonate and adult, C66

transport

anemia, resting and, E461  
postnatal changes, awake state (lamb), H100

uptake

calmodulin-calcium complex, liver lobe, G383

intestinal denervation effects, newborn (swine), G201

Oxygenation, adenine nucleotide content and, liver mitochondria, newborn, E530

Oxygen metabolites, cytotoxicity, gastric mucosal cells, G40

Oxygen radicals

free  
detection, heart, H709

postischemic ventricular dysfunction, H1372

gastric mucin interactions, G93  
generation, gastric injury induced by, G129

ischemic injury mediated by, intestinal microvasculature, G49

Oxyhemoglobin, saturation, reflectance measurements, H147

Oxyntic cells, stomach, sodium-hydrogen and chloride-bicarbonate exchange, C30

Oxytocin, inhibition by water, hypovolemia, opioid peptides and, R31

Oxytocinergic cells, hypothalamus, activation by cholecystokinin and gastric distension, R661

## P

### Pacemaker

circadian, sleep onset and, R172  
constant light and melatonin injections, activity rhythms, R101

Pacing, atrial, ANP release during tachycardia, R696

PAH: see *p*-Aminhippuric acid

Pain, sensitivity, monoamine turnover and, hypertension, R910

### Palmitate

<sup>14</sup>C-labeled, coronary hyperperfusion and myocardial metabolism (swine), H1271  
turnover, high-altitude adaptation and (llama), R298

### Pancreas

basal secretion, G97  
clamp, glucose homeostasis, fasted awake state, E435  
developing, calcium-calmodulin-stimulated protein kinase, G469  
endocrine, morphology in exocrine insufficiency, G139

#### exocrine

insufficiency, morphology of endocrine pancreas in, G139  
localization of sodium-potassium-ATPase, G99  
intracellular pH and amylase release, secretagogue-induced, G690  
lysosomal enzymes, subcellular redistribution, G508  
protein secretion, zymogen granule acidity and, G711

#### secretion

CCK, G445  
CCK-58, detection in blood, G477  
somatostatin, vagal reception of, R200

### Pancreatic acini

gastrin receptors on (guinea pig), G793  
intracellular pH and amylase release, secretagogue-induced, G690  
membrane, coupling of guanine nucleotide inhibitory protein to somatostatin receptors, G308

Pancreatic cells, endocrine, exocrine insufficiency and, G139

Pancreatic duct, fluid, secretion of CCK, G445

Pancreatic enzyme, secretion, cholinergic pathway, polypeptide effects, G706

Pancreatic islets, immature target cells in, 1,25-dihydroxyvitamin D<sub>3</sub> in, E99

### Pancreatitis

caerulein-induced, lysosomal enzyme redistribution and, G508

intracellular transport, zymogens, G517

Papillary muscle: see Muscle, heart

Parasympathetic control, aging, modulation of heart rate, H874

Parasympathetic nervous system

pulmonary vasodilation, arginine vasopressin-induced, H493

thermic effects of food, E481

Parasympathomimetics, adenylate cyclase inhibition, airway smooth muscle, C97

### Parathyroid hormone

blood flow and, different regional circulations, R634

carbonic anhydrase activity and, osteoblasts (chick), E670

free calcium and, renal cells, F328

gluconeogenesis and, proximal tubule cells, F802

improved separation method, kidney tubules, F358

intracellular calcium and, osteoblastlike cells, E45

25(OH)D<sub>3</sub>-1 $\alpha$ -hydroxylase response to, blood calcium effects, renal, E503

phosphate transport and, kidney, E221

phosphaturia of, acute hypercapnia effects, F34

Parathyroid hormone antagonist, evaluation, multiparameter bioassay, E187

### Paraventricular nucleus

lesions, obesity following, R523  
renin secretion and, R179

### Parietal cells

histamine H<sub>2</sub>-receptor effects, G497  
protein phosphorylation, histamine effects, G823

secretory apparatus, hormonal effects on development, G284

Parkinson's disease, jejunal myoelectric activity, MPTP alterations in, G809

Parotid acini, cytosolic calcium in, stimulation-induced changes, G290

### Parotid gland

protein secretion, C774  
sodium-potassium-ATPase, monoclonal antibody localization of, G99  
type I receptors, aldosterone selective, E467

Pars convoluta, proximal tubule, proline cotransport, F15

Pars recta, NAD dynamics, F269

Pathophysiology, dystrophic diaphragm (hamster), R275

PDGF: see Platelet-derived growth factor

Pectinate muscle, conduction block, around preferential pathway, H16

Pelvic nerve, stimulation, sympathetic nervous system and, G531

Pentagastrin, acid secretion and, G298

Pentobarbital, anesthesia, alterations in glucose kinetics, E657

Pepsinogen, secretion, synergism between cellular messengers and agonist combinations (frog), G557

Peptide histidine isoleucine

prejunctional inhibition of, G7  
VIP release and, vagal stimulation, G13

Peptidergic nerves, gastrin secretion and, antrum (pig), G643

Peptides: see also Polypeptides

absorption, opiate activity and, ileum, G737

adrenal, corticotropin-releasing factor role in, R209

#### atrial

mesenteric resistance vessels in spontaneous hypertension, H1612

natriuresis, angiotensin II role in, F880

renal response to volume expansion and, R786

chain initiation, diabetes, muscle, E81

degradation, proximal tubule, F1120

gastrin-releasing, antrum (pig), G643

gastrin-releasing analogues, gastrin and somatostatin release and, stomach, G206

gastrointestinal absorption, maturation effects, G68

metabolism, CCK-58 detection in blood, G477

muscarinic-vasoactive intestinal, interactions, lacrimal gland, C514

opioid, inhibition of vasopressin and oxytocin, R31

parathyroid hormone antagonist, multiparameter bioassay, E187

processing intermediates, glycine-extended, G502

vasoactive, splanchnic and renal responses to glucagon, F1105

#### vasoactive intestinal

cAMP-mediated cholinergic transmission, myenteric plexus, G607

opioid neuron regulation of, G226

peristalsis and, G434

prejunctional inhibition (guinea pig), G7

protein phosphorylation and, colonic epithelial cells, G420

stimulation of ion transport, salt gland (duck), R801

sweat secretion and, eccrine glands (monkey), R935

Peptide YY, inhibitory action, gastric acid secretion, G298

Pericardium, biaxial mechanical properties of, H75

Perineurium, calcium content, chronic hypercalcemia and hypocalcemia (frog), R655

Peripancreatic vein, somatostatin reception, R200

### Peripheral nerve

calcium content, chronic hypercalcemia and hypocalcemia (frog), R655

metabolic and vascular response, exsanguination, E349

Peristalsis, intestinal, regulation by opioid neurons, G226

Perivascular nerves, control of motility, ileum, G726

### Permeability

absorptive cell tight junctions, intestinal, cytoskeleton and, C171

bicarbonate, metabolic alkalosis, proximal tubular, F89

capillary, intestinal, experimental diabetes mellitus, G20

capillary endothelium, extracellular space marker, heart, H1305

changes, after coagulation, lung, H634

endothermic metabolism, evolution of, R1

glomerular, capillary wall and basement membrane, F783

intestinal tight junction, alteration by cytoskeletal contraction, C854

#### macromolecular

modulation by  $\beta$ -adrenoceptor stimulant (hamster), H1586

solvent drag reflection coefficient, H194

membrane, after osmotic opening, R459

microvascular, neutrophils in, H699

muscle, glucose, exercise effects, E331

osmotic water, proximal tubules, F563

- Permeability (continued)**  
 peritubular capillary, kidney, F180  
 potassium and chloride, apical membrane, protamine atteration of (salamander), C662  
 potassium ion membrane, chloride secretagogue effects, cornea (frog), C555  
 vascular, intestinal, oxygen-mediated ischemic injury, G49  
 water, forskolin-treated bladder (toad), F120  
 water and solute, kidney membranes, R8
- Pertechnetate**, blood, kinetics, sampling site effects, model, E691
- Pertussis toxin**  
 cAMP-mediated cholinergic transmission, myenteric plexus, G607  
 inhibition, epithelial sodium transport, F372  
 inhibition of ADH action and, collecting tubules, C105  
 potassium conductance and, pituitary tumor cells, E28
- pH**  
 bone resorption, cell-mediated, E90  
 cell  
   renal, postnatal maturation of, F622  
   sodium channels and, cortical collecting tubule, F333  
 changes  
   calcium fluxes and contractile state during, heart cells (chick), C137  
   sodium pump fluxes and, giant axon (squid), C547  
   chloride transport and, thick ascending limb of Henle's loop, F1216  
   disequilibrium, ammonia transport and, cortical collecting tubules, F1232  
 intracellular  
   alkalinity measurement of cellular net acid-base fluxes, C525  
   astrocytes, cortical stimulation and, R566  
   cell coupling, bladder (toad, turtle), F588  
   electrogenic sodium bicarbonate cotransport, proximal tubule, F340  
   flow cytometric analysis, C121  
   homeostasis, HL60 cells, C619  
   influence on contractile function, working heart, H1499  
   intercellular communication, C607  
   liver, type A hypoxic lactic acidosis, E271  
   myocardial response to acidosis and, H1261  
   renal epithelial cell growth, C633  
   renal papilla collecting cells, F889  
   secretagogue-induced, pancreatic acini, G690  
   sodium-hydrogen antiport activity and, aorta, C193  
   sodium-hydrogen exchange, proximal cells, F935, F945  
 luminal, ammonia entry and, proximal tubule, F760  
 renal, micropuncture study (starling), R587  
 steady-state, control in proximal straight tubules, F282  
 systemic regulation, ammonium and urea in, F199  
 urinary buffer excretion, ammonia, F595
- Phenol**, topical application, ischemic myocardium, epicardial mapping (pig), H138
- Phentolamine**  
 adrenergic effect, internal cardiac defibrillation threshold, H500  
 inhibitory control, proximal colonic motility, G531  
 sympathetic control of motility and, ileum, G726
- Phenylephrine**  
 adrenergic effect, internal cardiac defibrillation threshold, H500  
 baroreflex buffering, awake state, H728  
 cytosolic free calcium and, parotid acini, G290  
 gluconeogenesis and, proximal tubule cells, F802  
 potassium uptake and, myocardium (pig), H799  
 respiratory stimulation and, brown fat cells (hamster), C301
- N-Phenylmaleimide**, sodium-hydrogen exchange and, red blood cells, C60
- PHI: see** Peptide histidine isoleucine
- Phloretin**, chloride transport and, thick ascending limb of Henle's loop, F1206
- Phlorizin**, inhibition of sodium-dependent hexose uptake, LLC-PK<sub>1</sub> cells (pig), C199
- Phorbol esters**  
 antagonism, histamine and, airway smooth muscle cells, C561  
 calcium ionophore and, chloride secretion, tracheal epithelium, C828  
 contractions induced by, intracellular calcium levels in, aorta, H1365  
 effect on contractile state and calcium flux, heart cells (chick), H205  
 protein kinase C and, chloride secretion, tracheal epithelium, C802  
 PTH and, phosphate transport, kidney, E221
- Phorbol myristate acetate**, effect on contractile state and calcium flux, heart cells (chick), H205
- Phosphate**  
 dietary intake, nicotinamide and, cortical nephron segments, F269  
 excretion, renal, aging, awake state, R555  
 high-energy  
   metabolism, myocardial function and, H412  
   working heart, H1215  
 inorganic  
   energy metabolism, skeletal muscle, C316  
   myocardium metabolism and coronary flow relations, H1098  
   phosphaturia of hypercapnia, F34  
   inositol, protein kinase c and, fundic D-cells, G62
- transport**  
   alkalinity measurement of cellular net acid-base fluxes, C525  
   regulation by PTH, kidney, E221  
   urinary excretion of, F595  
   vitamin D<sub>3</sub> effects and, cardiovascular function, E675
- Phosphatidylcholine**  
 disaturated, thyroid hormone effects, lung, fetus, R592  
 uptake and degradation, granular pneumocytes, C792  
 uricase transport function, evidence for, F702
- Phosphatidylethanolamine**, sarcolemmal, cardiac hypertrophy, H8
- Phosphocreatine**  
 cardiac tissue, anaerobic conditions (trout), R838  
 detectable, absence, luteal cells, E391  
 elevation, force and metabolism in aorta and, H461  
 energy metabolism, exercise effects, skeletal muscle, C316
- Phosphodiesterase**, angiotensin effects, aorta, C147
- Phospholipase C**  
 PDGF effects, mesangial cells, F458  
 secretion, mediated by protein kinase c, fundic D-cells, G62
- Phospholipases**, angiotensin II effects, mesangial cells, C113
- Phospholipids**, methylation, cardiac hypertrophy, H8
- 5-Phosphoribosyl-1-pyrophosphate**, purine synthesis and, liver, E684
- Phosphorus**, 1,25-dihydroxyvitamin D<sub>3</sub>, metabolic clearance rate, E246
- Phosphorylation**  
 action potential duration and, ventricular muscle, during energy block, H373  
 protein, parietal cell, histamine effects, G823  
 sodium-hydrogen exchange, fibroblasts, C219
- Photobleaching**, fura-2, calcium concentrations, C613
- Photolabeling**, sodium-potassium-chloride cotransporter, kidney, C243
- Photoperiod**, hibernation and, castration (hamster), R337
- Photoperiodism**, hormone rhythms, long and short days, male (hamster), R321
- Pineal gland**  
 constant light and melatonin injections, activity rhythms, R101  
 prenatal-sensitive period, maternal-fetal communication of day length (hamster), E701
- Pituitary cells**  
 anterior  
   cytosolic free calcium concentration, GRF effects, E591  
   LHRH degradation, E317  
   calcium channels, blockade by calcium antagonists, C162  
   LH hyposecretion from, ionophore A23187 and aging effects, E233  
   tumor, potassium conduction in, pertussis toxin effects, E28
- Pituitary gland**  
 anterior, pulsatile GH release, E508  
 calcium channels, blockade by calcium antagonists, C162  
 gonadotropin secretion  
   cAMP effects, female, E290  
   cAMP effects, male, E296  
 type I receptors, aldosterone selective, E467
- Placenta: see also** Fetus; Lactation;  
 Pregnancy  
 infusion, gestation, gravid uterus (cow), R735  
 lactogen concentration, pregnancy, E40  
 water flux, chronically cannulated fetus (sheep), R389
- Plasma**  
 amino acids: *see* Amino acids

- antidiuretic hormone, angiotensin II and (duck), R285

- adrenoceptors  
aging and, H1566  
coronary autoregulation and, H365  
coronary vasoconstriction, awake state, H388  
intracellular distribution, hypertension, myocardium, H904  
liver blood flow regulation and, H1053  
sodium absorption, glucose metabolism and, renal, F810  
stimulant, modulation of macromolecular permeability (hamster), H1586  
stimulation, potassium uptake during, myocardial (pig), H799  
vasopressin secretion and, newborn (pig), R489  
aldosterone-selective, parotid, colon, and pituitary, E467
- ANP  
regulation on smooth muscle cell, C809  
visualization on kidney glomerulus, F1050
- antidiuretic, DOC-salt hypertension and, F952
- autoreceptors, prejunctional inhibition of peptide release (guinea pig), G7
- baroreceptors  
aortic, sympathetic modulation of, H1106  
arterial, ANP reflex control of, H1136  
attenuation by cardiovascular sympathetic afferent fibers, F787  
carotid and aortic, control of heart rate, awake state (monkey), H811  
carotid, response, renal hypertension, R566  
central pathways, caudal medulla, H777  
denervation, pressure liability in, H466  
hepatic, cirrhosis, F664  
hypoxia and blood pressure control (sheep), H1409  
sodium chloride, renin release and, F1051
- cardiac  
head-out water immersion effects, awake state, R242, R254  
intestinal transport and, G116
- catecholamine, ischemia- and agonist-induced changes (guinea pig), H1159
- chemoreceptors  
carotid, tachycardia of, apneic asphyxia and, H591  
central, nasal resistance and, R494  
cholecystokinin, characterization on pancreatic acini (guinea pig), G793  
esophagus plexus submucosus, substance P binding sites, R167  
gastrin, characterization on pancreatic acini (guinea pig), G793
- $H_2$ , parietal cells, G497
- IgA, cholestasis effects, G232
- IGF, distribution in plasma membrane, proximal tubular cells, F841
- insulin  
fasting-mediated alteration studies, obese women, E193  
glucose transport and antilipolysis, diabetes, E300  
lipolysis in exercise, E383
- intestinal, neural, hemodynamic, and renal responses to stimulation, H1167
- mechanoreceptors, cardiac, vasopressin and, H1
- modulation of, during sucrose feeding, food deprivation, and cold exposure, E629
- muscarinic, ileal ion transport and (guinea pig), G323
- muscarinic and nicotinic, internal anal sphincter (opossum), G345
- muscarinic cholinergic, QNB, colonic smooth muscle cells, G656
- platelet activation, prostaglandin  $H_2$  analogues and, H1035
- renal, vasopressin neurons and, R234
- renal sensory, efferent renal nerve activity and, F767
- somatostatin, coupling to guanine nucleotide inhibitory protein, pancreatic acinar membrane, G308
- spare, drug action and, E114
- substance P, intestinal smooth muscle cells (guinea pig), G666
- $\alpha$ -subtypes, changes in pressor responses, calcium channel modulation and, awake state, H531
- triiodothyronine, brown fat function and, E255
- vasopressin, cultured mesangial cells, F41
- vitamin D, pancreatic islets, E99
- Rectification, inward, muscarinic potassium ion current, heart (guinea pig), H210
- Red blood cells: see Erythrocytes
- Reflexes  
aortic control, total systemic vascular capacity and, H598
- baroreflex  
area postrema stimulation and, H91  
arterial, acute resetting in hypertension, H974  
control of heart rate, awake state (monkey), H811  
mechanisms buffering  $\alpha$ -adrenergic agonists, awake state, H728  
medullary raphe lesions, R91  
pressor sensitivities in diabetes, R726  
sensitivity, cardiac model, H680
- baroreceptor-vasomotor, depressor neurons in caudal medulla and, H777

- plasma activity  
chloride in correction of alkalosis, F1031
- Goldblatt hypertension, H1623
- suprarenal aortic flow reductions and (lamb), H838
- release  
control by sodium chloride, F1051
- plasma lymph, during hyperchloremia, F734
- prostaglandin role in, kidney, F929
- renal nerve stimulation and, F976
- renal, exogenously administered, distribution of, E621
- secretion, regulation of, serotonergic pathways and hypothalamus in, R179
- Renin-aldosterone system, blood pressure and, cyclosporin effects, H1596
- Renin-angiotensin system  
hypothyroidism and, glomerular dynamics of, F170

temperature sensitivity of (squirrel),  
F471

Reperfusion, microvascular injury induced  
by, neutrophils in, H699

Reproductive hormone, patterns of secre-  
tion, hibernation and (hamster),  
R329

Resistance  
atropine, somatostatin and gastrin secre-  
tion and, antrum (pig), G767

coronary, late diastolic, awake state,  
H388

insulin  
glucose transport and antilipolysis, di-  
abetes, E300

suckling period, E142

membrane,  $\beta$ -receptor stimulation in  
proximal tubules (salamander), F636

nasal, ventral medulla and, R494

peripheral  
diurnal patterns, nonhuman (mon-  
key), R779

input impedance during cardiac cycle,  
H317

pulmonary vascular, eicosanoids in, neo-  
nate (lamb), H626

pyloric, flow, awake state, G72

renal vascular  
ANF and, F234

autoregulatory response to prostaglan-  
dins, F66

renin and angiotensin II release during  
hyperchloremia, F734

salt, left atrial sensory endings in, H133

source, left ventricular pressure-volume  
relations, H83

transepithelial, utricle, potassium secre-  
tion and (gerbil), F613

transient flow, blood, H919

vascular  
aortic arch reflex control, H598

cardiac receptors and intestinal trans-  
port, G116

complement activation effects (swine)

coronary collateral,  $\alpha$ -adrenergic re-  
ceptor effects, H582

splanchnic changes, renal hyperten-  
sion, G146

wrist occlusion and, hypertensive men,  
H217

Resistometer, pneumatic, antroduodenal  
resistance to flow, awake state, G72

Respiration  
cellular, substrate utilization, renal, F351

oxygen dependence, determinants of,  
kidney mitochondria, F440

perfused hearts, thyroid state effects,  
H519

Respiratory chain, mitochondrial, iron-de-  
ficient muscle, C639

Respiratory exchange, dietary effects,  
thermogenesis, E264

Respiratory frequency, hypoxia and hyper-  
capnia effects (swallow), R854

Respiratory quotient,  $\beta$ -adrenergic block-  
ade, obese women, E65

Respiratory regulation  
discharge patterns of neurons, control by  
pulmonary vagal afferent input,  
R809

mechanisms, brown fat cells (hamster),  
C301

Respiratory sinus, arrhythmia, beat-to-  
beat model, H680

Rest, ryanodine and, extracellular calcium  
changes, heart muscle, C398

Rheology, blood, small tubes, H540

Rhodamine 123, mitochondrial clusters,  
white fat cells, C783

Rhythms  
activity, melatonin injections and, con-  
stant light, R101

circadian  
antipyretic drug effects, R306

benzodiazepine effects (hamster),  
R204

during restrictive feeding, R46

kaliuretic regulatory factors, F1182

long and short days, male (hamster),  
R321

maternal-fetal communication, E401

diurnal  
obesity following PVN and VMH le-  
sions, R523

plasma excretion, F1178

variation, hemodynamic monitoring,  
awake state, H1335

GH release, GH-releasing factor and so-  
matostatin effects, E508

Ribonucleic acid  
messenger  
ANP content, myocardial infarction,  
H1449

cardiac calcium channels after injec-  
tion, H985

increase, recovery of atrophied muscle  
and, C205

messenger S-14, liver, during weaning,  
E536

polyamines and, gastric damage, G1

ribosomal protein messenger, compensa-  
tory renal hypertrophy, C506

Ribosomes, synthesis, during compensa-  
tory renal hypertrophy, C506

Ristocetin, platelet aggregation induced by,  
H1208

Ritodrine, infusion, myometrial desensiti-  
zation after, E410

RNA: see Ribonucleic acid

Rubidium, secretory flux, ADH effects,  
cortical collecting tubules, F76

Ryanodine  
calcium content, sarcoplasmic reticulum,  
C408

conductance and gating behavior, cal-  
cium release channel, C364

contractile function and, young and  
adult heart cells, H1484

rest duration and, extracellular calcium  
changes, heart muscle, C398

S

Sacral nerves, internal anal sphincter and  
(opossum), G345

Saline, infusion, ANP in natriuresis, R877

Salivary gland, minor, lingual lipase and  
amylase secretion, G217

Salt  
adaptation, CSF and plasma (duck),  
R285

balance  
Malpighian tubules (mosquito), R701

medullary collecting duct, local de-  
pendency, F642

hyperosmotic sodium, reversal of hemor-  
rhagic shock, H751

intake, hepatic control of, R444

perfusion, lungs, hypoxic vasoconstric-  
tion in, dexamethasone effects,  
H574

secretion  
nasal salt glands (lizard), R83

VIP stimulation of ion secretion  
(duck), 801

sensitivity, left atrial sensory endings  
after low-salt diet, H133

taste transduction, amiloride-sensitive  
sodium channels and, R371

Salt gland  
ion transport, VIP stimulation of (duck),  
R801

nasal, potassium secretion (lizard), R83

Sarcolemma  
arachidonic acid distribution, myocar-  
dium, C846

calcium transport, diabetic cardiomyopa-  
thy, E202

phosphatidylethanolamine N-methyla-  
tion, during heart hypertrophy, H8

quantification of calcium paradox, neo-  
nate, H1358

Sarcolemmal membrane, cardiac, sodium-  
calcium exchange, hypoxia and,  
H1026

Sarcomere, length, calcium binding and,  
cardiac muscle, C90

Sarcoplasmic reticulum  
calcium content, ryanodine effects, caf-  
feine and rapid cooling contractures,  
C408

calcium release channel, ryanodine ef-  
fects, C364

extracellular calcium changes, rest dura-  
tion and ryanodine effects, C398

twitch contraction, magnesium inhibi-  
tion of, H240

twitch tension regulation, during calcium  
overload (sheep), H1540

Sartorius muscle, arteriolar network archi-  
tecture, quantitative analysis, H154

Satiety, cholecystokinin mechanisms, re-  
duction of food intake, R379

Sciatic nerve, calcium content, chronic hy-  
percalcemia and hypocalcemia  
(frog), R655

SC: see Secretory component

Secretagogues  
chloride, basolateral potassium conduct-  
ance and, cornea (frog), C555

cytoplasmic free calcium and, alveolar  
type II endothelial cells, C679

intracellular pH and amylase release in-  
duced by, pancreatic acini, G690

redistribution, pancreatitis, G508

supramaximal stimulation, intracellular  
digestive enzyme transport, G517

Secretin, insulin extraction and, liver,  
E603

Secretory apparatus  
hormonal effects on development  
chief cells, G274

parietal cells, G284

Secretory component, secretion, into bile,  
cholestasis effects, G232

Sepsis  
*E. coli*, myocardial depression induced  
by, diabetes and, H276

glucose kinetics, diabetes and, E123

intracellular calcium mobilization dur-  
ing, diltiazem effects, hepatocytes,  
R545

IP<sub>3</sub>-dependent release, permeabilized  
hepatocytes, E130

triacylglycerol kinetics, suppressed lipo-  
protein lipase kinetics, E59

Serotonergic pathways, brain, regulation of  
renin secretion, R179

- Serotonin  
feeding responses and, amino acid imbalance, R763  
ion transport, anaphylaxis-induced, G540  
measurement of calcium concentration, tracheal smooth muscle (calf), C817  
transport, plasma membrane fluidity and, endothelial cells, C672
- Serum, deprivation, 3T3 cells, flow cytometric analysis, C121
- Sex differences, obese women, insulin action on lipolysis and lipogenesis, E193
- Shock  
endotoxic  
diltiazem effects, cellular calcium regulation, R549  
intracellular calcium mobilization during, diltiazem effects, hepatocytes, R545  
naloxone and regional cerebral perfusion, R425  
hemorrhagic  
adrenalectomy, enkephalin and vasopressin release, R467  
reversal by hyperosmotic sodium salts, H751  
microlesions and, myocardial cells, H480  
osmotic, calcium concentrations, HL60 cells, C619

 Subfornical organ, lesions, captopril effects, R799  
 Submucosal nerves, stimulation, mucosal response to, ileum (guinea pig), G323  
 Substance K, smooth muscle cells, intestinal (guinea pig), G666  
 Substance P  
    $\beta$ -adrenergic synergism, protein release and, parotid gland, C774  
   antagonist, somatostatin and gastrin secretion and, antrum (pig), G767  
   gastric effects of, brain stem neuronal response, G369  
   high-affinity binding sites, esophagus plexus submucosus, R167  
   receptors: *see* Receptors  
   smooth muscle cells, intestinal (guinea pig), G666  
 Substrates  
   flux, high-altitude adaptation and (llama), R298  
   metabolic, papillary collecting duct cells, F251  
   mobilization, hormonal changes and, motor center activity role in, 687  
   myocardium, ischemic and reperfused, H107  
   utilization, renal, acidosis and, F351  
 Succinate, transport, renal basolateral and brush-border membrane, F432  
 Suckling  
   insulin resistance during, E142  
   postglucoprivic insulin-induced, R121  
 Sucrose  
   blood-brain barrier permeability, after osmotic opening, R459  
    $^{14}$ C-labeled, space, pressure and intimal damage effects, aorta, H1530  
   extracellular space marker, heart, H1305  
   feeding, modulation of receptors and adenylate cyclase activity, E629  
   feeding supplemented with, hyperactivity and, R434  
 Sugars  
   behavior and, hyperactivity, R434  
   stimulation of ornithine decarboxylase activity, digestive tract mucosa, G303  
   transport, membrane, bacteremia and, soleus muscle, R55  
 Sulfate  
   canalicular transport, liver, G461  
   transport, apical membrane vesicles, tracheal epithelium, C416  
 Sulfhydryl  
   membrane groups, diamide and, red blood cells, C580  
   modification, carnitine-acylcarnitine

Sulphydryl (*continued*)  
translocase in ischemia, H1557  
Sulphydryl-reacting agent, potassium transport and, density-separated red blood cells, C7  
Superoxide, cytotoxicity, gastric mucosal cells, G40  
Superoxide dismutase  
cytotoxicity, gastric mucosal cells, G40  
differences in induction, lungs, neonate and adult, C66  
thyroid hormone effects, lung, fetus, R592  
Suprachiasmatic nuclei, circadian rhythms, maternal-fetal communications, E401  
Supraoptic nucleus  
neurosecretory vasopressin cells, renal receptor activation and, R234  
oxytocinergic cells in, activation by cholecystokinin and gastric distension, R661  
Surfactant  
natural, uptake and degradation, granular pneumocytes, C792  
pulmonary, secretion, calcium and, C679  
thyroid hormone effects, lung, fetus, R592  
Sweat, secretion, VIP and, eccrine glands (monkey), R935  
Sympathectomy, regional myocardial, epicardial mapping in (pig), H138  
Sympathetic activity  
alterations, medullary raphe lesions, R91  
lactation and, brown fat, E515  
lumbar, differential effects of spinal transection, R611  
renal  
spinal transection effects, R619  
vasopressin modulation of, R605  
Sympathetic nerves  
activity, ANP reflex control of, H1136  
adrenergic vasoconstrictor responses, aging and, H1566  
control of motility, ileum, G726  
developing cardiac hypertrophy and, Grollman hypertension, H818  
modulation, aortic baroreceptors, H1106  
renal, baroreceptor-vasomotor reflex, H777  
Sympathetic nervous system  
adenosine role in, spontaneous hypertension, H909  
glucose-induced norepinephrine levels, obesity resistance and, R475  
inhibitory control, proximal colonic motility, G631  
pulmonary vasodilation, arginine vasopressin-induced, H493  
renal activity, inhibition by area postrema stimulation, H91  
thermogenesis controlled by, hypothalamic lesion and overeating effects, R626  
Synapsin I, RBC protein 4.1 relations, C500  
Synchronization, internal, melatonin injection effects, R101  
Synergism, post-receptor, parotid gland, C774  
Systemic perfusion, low, postnatal changes, awake state (lamb), H100

T

Tachycardia  
ANP mechanism of release during, R696

apneic, low control heart rate and, H591  
carotid chemoreceptors, apneic asphyxia and, H591  
coronary vasodilator reserve during (pig), H422  
postpacing, H333  
Tachykinins, smooth muscle cells, intestinal (guinea pig), G666  
Taenia coli, vasoactive intestinal peptide release, prejunctional inhibition of, G7  
Tannic acid, renin distribution, exogenously administered, kidney, E621  
Taurine, transport, liver, G351  
Taurocholate  
absorption, intestinal (killifish), G730  
chlorpromazine effects, hepatocytes, G613  
Taurodeoxycholate, development and, distal colon, G483  
T3 cells, intracellular pH, flow cytometric analysis, C121  
TEA: see Tetraethylammonium  
Temperature  
extreme ambient, adaptation in cold acclimation (gerbil, mouse), R39  
regulated, intracranial injections of norepinephrine (goldfish), R821  
regulation, muramyl dipeptide, neonate, R646  
sensitivity, renin-angiotensin system (squirrel), F471  
Temperature, body  
brown fat metabolism, high-fat diet and adrenalectomy effects, E149  
circadian rhythms in, antipyretic drug effects, R306  
cycle, onset of sleep and, R172  
free diving and (seal), R344  
glucose kinetics, pentobarbital anesthesia and, E657  
muscle, forced elongation and, C484  
regulation, spinal and hypothalamic heating effects (sheep), R868  
tissue profiles, role of vascular system in, R128  
Tension-area relations, biaxial mechanical properties, pericardium, H75  
Testicular hormone, rhythms, long and short days, male (hamster), R321  
Testosterone  
reproductive hormone secretion (hamster), R329  
rhythms, long and short days, male (hamster), R321  
12-O-Tetradecanoylphorbol-13-acetate, cytoplasmic free calcium and alveolar type II endothelial cells, C679  
sodium-hydrogen exchange and, fibroblasts, C219  
Tetraethylammonium  
clearance ratio, renal tissue (flounder), R861  
transport, renal brush-border and basolateral membrane vesicles, F1040  
Tetraphenylphosphonium, accumulation, membrane potential and, fibroblasts, C391  
Theophylline  
cAMP-mediated fluid secretion, Malpighian tubules (mosquito), R701  
normoxia and hypoxia, adenosine regulation, H165  
Thermodynamics, mass exponent, metabolic scaling, R195

Thermogenesis  
 $\beta$ -adrenergic blockade, energy expenditure and, E65  
autonomic nervous system and, E481  
brown fat  
dietary obesity, model, R756  
pregnancy and (hamster), R314  
cortical control of, lateral hypothalamic lesion and overeating, R626  
diet-induced  
brown adipose tissue and, R158  
cafeteria feeding and, E264  
endothermic metabolism, evolution of, R1  
epinephrine stimulation, metabolic rate, E322  
exercise effects, ovariectomy, R740  
glucose-induced, obesity resistance and, R475  
lactation and, brown fat, E515  
nonshivering, mechanisms of respiratory stimulation, brown fat cells (hamster), C301  
postprandial, hormonal control of, E521  
shivering  
heat and cold tolerance (gerbil, mouse), R39  
insulin and cold exposure effects, E179  
T<sub>3</sub> and, brown fat function, E255  
total parenteral nutrition, glucose-based, E135  
Thermoregulation  
analgesia and, hypertension effects, R910  
behavioral, intracranial injections of norepinephrine (goldfish), R821  
nasal heat, water exchange and (seal), R883  
selective cooling, brain (reindeer), R848  
spinal and hypothalamic heating, fever and (sheep), R868  
Thermosensitivity, spinal, fever and (sheep), R868  
Thiazide, sodium chloride cotransport sensitive to, distal tubule, F546  
Thiocyanate, inhibition, gastric acid secretion (bullfrog), G359  
Thiols, glutathione-related, age-dependent biliary excretion, G86  
Thiourea, cytotoxicity, gastric mucosal cells, G40  
Thirst: see Drinking  
Thixotropy, transient flow resistance, rapidly recovered, H919  
Threonine, infusion, leucine metabolism and, E428  
Thrombin, coagulation induced by, lung changes after, H634  
Thrombosis, platelet-fibrin interaction, H745  
Thromboxane  
aprotinin effects, obstructive nephrectomy, F1006  
autoregulation, renal blood flow, F66  
Thromboxane A<sub>2</sub>, hypoxic vasoconstriction and, lung (lamb), H626  
Thyroid  
respiration and, perfused hearts, H519  
structure and function, autoregulation effects, E165  
Thyroid hormones  
antioxidant enzyme maturation and, lung, fetus, R592  
heart failure, after myocardial infarction, H341

# SUBJECT INDEX TO VOLUME 253

rhythms, long and short days, male (hamster), R321  
 Thyroparathyroidectomy, 1 $\alpha$ -hydroxylase response, blood calcium regulation of, renal, E503  
 Thyrotropin-releasing hormone, inhibitory effects of, growth hormone secretion, E354  
 Thyroxine  
   rhythms, long and short days, male (hamster), R321  
   secretory apparatus development and chief cells, G274  
   parietal cells, G284  
   thermogenesis and, postprandial, E521  
 L-Thyroxine, chronic heart failure, after myocardial infarction, H341  
 Tibial artery, anterior, length-dependent sensitivity, hypertension and, H402  
 Tomography, positron emission, myocardial metabolism during reperfusion, H107  
 Toxin, heat stable, guanyl cyclase activation by, G775  
 Tracer studies  
   ketone body kinetics, E496  
   pulmonary distribution, blood radioiodide and pertechnetate kinetics, E691  
   retrograde technique, subdiaphragmatic vagotomy, R361  
   sample site selection for, circulatory approach, E173  
   stable isotope, models of kinetic data, E551  
 Trachea  
   epithelium  
     apical membrane vesicles, sulfate transport in, C416  
     chloride secretion, phorbol ester and ionophore A23187 effects, C828  
     chloride secretion, regulation by protein kinase C, C802  
   smooth muscle, cytoplasmic free calcium concentration in (calf), C817  
 Trachealis muscle, airway, adenylate cyclase in, muscarinic cholinergic inhibition, C97  
 Tractus solitarius, neuronal response, substance P, G369  
 Training: see Exercise  
 Transcytosis, CCK secretion, pancreas, G445  
 Transferrin, total-body radiation, plasma protein catabolism, R383  
 Transmitter, release, induced by black widow spider venom, C469  
 TRH: see Thyrotropin-releasing hormone  
 Triacylglycerol  
   chloroquine effects, intestines, G673  
   kinetics  
     endotoxin-suppressed lipoprotein lipase activity, E59  
 Trichinosis, anaphylaxis, chemical mediators of, G540  
 Trifluoperazine, erythropoietin production and, renal carcinoma cells, C797  
 Triglycerides  
   transport, plasma lipoproteins, E1  
   unidirectional, carbohydrate intake and, adipose tissue, E664  
 Triiodothyronine  
   antioxidant enzyme maturation and, lung, fetus, R592  
   brown fat function, optimal, E255  
   liver content, weaning, E536

rhythms, long and short days, male (hamster), R321  
 thermogenesis and, postprandial, E521  
 Trimethylamino-diphenylhexatriene, plasma membrane fluidity and, endothelial cells, C672  
 Tripeptidyl peptidase, brush border, renal, F649  
 Troponin C, heart, calcium binding (cow), C541  
 T<sub>3</sub>: see Triiodothyronine  
 Tubulovesicles, secretory apparatus, parietal cells, hormonal effects on, G284  
 Tumor necrosis factor  
   circulating interleukin 1 and, during inflammation, R922  
   interleukin 1 and, protein balance regulation, skeletal muscle, C766  
   recombinant, interleukin 1 and, slow-wave sleep, R142  
 Tyrosine, transport, intestinal (flounder), R264  
 Tyrosine kinase, band 3, red cell plasma membrane (chicken), C286

## U

U46619, vascular reactivity to, Goldblatt hypertension, H1523  
 Ulcer  
   gastric  
     ischemic injury, G129  
     ornithine decarboxylase relations and, G1  
 Ultramicrocryotomy, sodium-potassium-ATPase localization, exocrine pancreas and parotid gland, G99  
 Ultrasound, blood vessel responsiveness, H671  
 UMR 106 cells, calcium in, parathyroid hormone effects, E45  
 Uninephrectomy  
   autoregulatory response, prostaglandins, F66  
   dietary protein and, fluid absorption, proximal straight tubules, F222  
 Uranyl nitrate, insulin disposition and, renal failure, F884  
 Urate, transport function of uricase, F702  
 Urea  
   ammonium, systemic pH regulation and, F199  
   production, glucose infusion effects, E543  
   solute gradients, ANP effects, F679  
   transport, vasopressin effects, inner medullary collecting duct, F823  
 Ureter, unilateral obstruction, renal effects of aprotinin after, F1006  
 Uricase, oxidative, transport function of, F702  
 Urinary bladder  
   apical surface, three-dimensional structure, vasopressin-induced changes (toad), C707  
   calcium transport (turtle), R917  
   forskolin-treated, water permeability in (toad), F120  
   granular cells, permeabilizing (toad, turtle), F588  
   hydrogen current transients, induced by hydrogen gradient pulses (toad), F606  
   vasopressin response in, arachidonic acid effects (toad), F464

Urinary concentrating defect, prostaglandins and, potassium depletion, F1113  
 Urinary concentration, AVP, medullary blood flow and, F576  
 Urinary excretion  
   buffer, ammonia, F595  
   eicosanoids, pregnancy, F1197  
 Urine  
   excretion, restrictive feeding, R46  
   excretion of eicosanoids, pregnancy, F1197  
   flow, ANF effects, fetus (sheep), R561  
   hypertonic formation, model, F1020  
 Uterus, gravid, blood flow during gestation (cow), R735  
 Utricle, nonsensory region, potassium secretion (gerbil), F613  
 Uvomorulin, epithelial tight junctions, C749

## V

Vagal afferents: see Afferents  
 Vagal C-fibers, atrial sensory endings, low-salt diet, H133  
 Vagal efferents: see Efferents  
 Vagotomy  
   hepatic, regeneration and, G439  
   renal nerve activity, vasopressin effects, H1  
   renin release, dietary sodium chloride and, F1051  
   subdiaphragmatic, retrograde tracer technique, R361  
   unilateral, nicotinic sensitivity and, H394  
 Vagus ganglia, angiotensin II binding sites, H1618  
 Vagus nerve  
   corticotropin-releasing factor, gastric emptying and, G241  
   differential effects, antegrade vs. retrograde atrioventricular conduction, H1059  
   gastrin secretion, antrum (pig), G643  
   hepatic branch, liver regeneration and, G439  
   intra gastric pressure, cholecystokinin and, G165  
   pancreatic, somatostatin reception in, R200  
   stimulation, PHI and VIP corelease, G13  
   subdiaphragmatic vagotomy, retrograde tracer technique, R361  
   vagotomy, nicotinic sensitivity and, H394  
 Vanadate, acid secretion and, colon (guinea pig), G155  
 Vascular bed, endothelial cells from, ambient oxygen effects, H878  
 Vascular capacity, total systemic, aortic arch reflex control of, H598  
 Vascular networks, arteriolar architecture, quantitative analysis, H154  
 Vascular system, heat transfer and, R128  
 Vasoactive intestinal peptides: see Peptides  
 Vasoactive intestinal polypeptides: see Polypeptides  
 Vasoconstriction  
   baroreflex buffering, awake state, H728  
   coronary,  $\alpha$ -adrenoceptor-mediated, awake state, H388  
   hypoxic  
     eicosanoids in, lung (lamb), H626  
     salt-perfused lungs, dexamethasone effects, H574

- Vasoconstriction (*continued*)  
 hypoxic pulmonary, fetal (sheep), H941  
 microvascular alterations, hypertension and, H933  
 Vasoconstrictors, systemic hemodynamics, cardiac performance and, H1234  
 Vasoconstrictor responses, adrenergic, age-related changes, hindlimb, H1566  
 Vasoconstrictor sites, anteroventral third ventricle region, R827  
 Vasodilation  
 cholinergic, intracerebral arterioles, H1253  
 hypoxia, sinoaortic denervation and (sheep), H1409  
 parathyroid hormone effects, different regional circulations, R634  
 polypeptide, cAMP and cGMP involvement, H1074  
 preferential coronary, calcium channel blocker-induced, H604  
 pulmonary, arginine vasopressin and, awake state, H493  
 renal, limited capacity for, diabetes and, H845  
 trigeminal ganglion stimulation, R270  
 Vasodilator, renal, ANF and, F234  
 Vasodilator reserve, coronary, tachycardia and myocardial ischemia (pig), H422  
 Vasodilator sites, anteroventral third ventricle region, R827  
 Vasomotion, arteriolar bifurcations, skeletal muscle, H568  
 Vasopressin: *see also* Antidiuretic hormone  
 area postrema interaction with, during volume expansion, R605  
 arginine  
 ANP and rapid atrial pacing, R599  
 blood flow changes induced by, kidney medulla, F576  
 cellular action of, hypothyroidism, F104  
 DOC-salt hypertension and, F952  
 plasma osmolality and, fetus (sheep), R389  
 pulmonary vasodilation and, awake state, H493  
 release, heart rate and, during hemorrhage, H1012  
 transport in proximal tubule, F1120  
 baroreflex buffering, awake state, H728  
 cerebrospinal fluid kinin and, R137  
 cytosolic calcium levels and, mesangial cells, F1077  
 free calcium and, renal cells, F328  
 gastric distension and, activation of oxytocinergic cells, hypothalamus, R661  
 improved separation method, kidney tubules, F358  
 inhibition by water, hypovolemia, opioid peptides and, R31  
 neurosecretory cells, renal receptor activation and, R234  
 plasma, aldosterone and, awake state, R832  
 potassium depletion effects, collecting tubule, F408  
 pressor sensitivity to, diabetes, R726  
 pressure liability, chronic sinoaortic deafferentation, H466  
 receptors: *see* Receptors  
 release  
 hemorrhage and, adrenalectomy, R467  
 various degrees of rehydration and (sheep), R640  
 renal nerve activity and, vagal afferents, H1  
 response, arachidonic acid inhibition, bladder (toad), F464  
 rubidium secretory flux and, cortical collecting tubules, F76  
 secretion  
 adrenergic mediation of, newborn (pig), R489  
 inhibition of, oropharyngeal signals and, R509  
 osmoregulation and control of, R671  
 regulation of drinking and, R108  
 sodium chloride reabsorption and, medullary collecting duct, local dependency, F642  
 sodium-potassium-ATPase activity, cortical collecting tubule, F874  
 three-dimensional structure changes, apical surface of bladder (toad), C707  
 urea and water transport, inner medullary collecting duct subsegments, F823  
 vasoconstrictor role for, sodium-depletion, awake state, H763  
 Velocimetry, laser-Doppler, hybrid blood flow probe, G573  
 Venom, black widow spider, release of transmitter induced by, C469  
 Ventilation  
 arterial pressure, sinoaortic denervation and (sheep), H1409  
 controlled, apneic asphyxia and, H591  
 Ventilatory threshold, hypoxia and hypercapnia effects (swallow), R854  
 Ventral medulla, nasal resistance and, R494  
 Ventricular cells, cardiac, electrical restitution process in, H1018  
 Ventromedial nucleus, renin secretion and, R179  
 Verapamil  
 frequency-dependent myocardial depression induced by, awake state, H487  
 parathyroid hormone effects on calcium and, osteoblastlike cells, E45  
 Vessels, thermally significant, heat transfer and, R128  
 Videodensitometry, flow rate measurement, proximal tubules, F366  
 Videofluoroscopy, contractile patterns, small intestine, G259  
 Videomicroscopy, AVP effects, medullary blood flow, F576  
 Villus-crypt axis, localization of cholesterol synthesis along, diabetes and, G336  
 VIP: *see* Peptides or Polypeptides, vasoactive intestinal  
 Viscoelasticity, pericardium, H75  
 Vitamin D  
 dependence, integral membrane calcium-binding protein, G411  
 metabolism  
 renal failure, F1015  
 spontaneous hypertension and, F712  
 parathyroid hormone antagonist and, multiparameter bioassay, E187  
 Vitamin D<sub>3</sub>  
 1,25-dihydroxy-  
 cardiovascular function and, E675  
 metabolic clearance rate, estimation of, E246  
 regulation by blood calcium, renal, E503  
 target cells, immature pancreatic islets, E99  
 25-hydroxy-  
 metabolism, magnesium depletion effects, E106  
 response to PTH, blood calcium effects, renal, E503  
 VMH: *see* Hypothalamus, ventromedial  
 Voltage  
 oscillation, magnesium inhibition of depolarized myocardium, H240  
 transepithelial  
 cortical collecting tubules, F896  
 renal proximal tubule (starling), R587  
 Voltage-clamp technique, potassium current modulation, heart cells, H1321  
 Volume  
 absorption, microanatomy of proximal tubules, F126  
 bleeding, central opioid cardiovascular control in, H507  
 blood  
 ANF effects, fetus (sheep), R561  
 cortisol infusion effects, fetus (sheep), R904  
 intramyocardial, cardiac arrest, anesthesia and (goat), H307  
 plasma sodium and, after water intake, R15  
 restitution after hemorrhage (sheep), R541  
 brain  
 control, acute hyperosmolality and, F538  
 regulation, during acute hyperosmolality, F530  
 cell  
 osmotic water flow and, proximal tubules, F1091  
 regulation, diamide and, C580  
 sodium-hydrogen exchange in, C60  
 coronary vascular, first moments of cardiac arrest (goat), H307  
 elastance, time-varying ventricular, H475  
 expansion  
 ANF and, F1129  
 ANP, right atrial pressure, and sodium excretion in, F959  
 ANP in natriuresis, R877  
 efferent renal nerve activity and, F767  
 hypocalcemia-associated modulation of renal response to, F726  
 neural control, awake state, F1164  
 renal response to, atrial appendectomy and, R786  
 vasopressin and area postrema interaction during, R605  
 vasopressin effects, renal nerve activity, H1  
 extracellular, metabolic alkalosis, proximal tubular, F89  
 inspired minute, hypoxia and hypercapnia effects (swallow), R854  
 interstitial fluid, skin and muscle, H291  
 regulation  
 acute hyperosmolality, brain, F522  
 epithelial tissues, C177  
 stroke  
 diurnal patterns, nonhuman (monkey), R779  
 impedance cardiography, adult and neonate, H1298  
 mechanical alternans, beating heart, model, H690

# SUBJECT INDEX TO VOLUME 253

temperature effects (snake), R222  
 von Ebner's gland, lingual lipase and amylase secretion, G217  
 von Willebrand factor, binding to platelets, platelet aggregation induced by, H1208

## W

Wall-to-lumen ratio, alterations, hypertension and, H933  
 Water  
   absorption, proximal tubules, F563  
   balance, Malpighian tubules (mosquito), R701  
   brain  
     acute hyperosmolality and, F538  
     regulation during acute hyperosmolality, F522, F530  
   content  
     sucrose and albumin spaces, aorta, H1530  
     tissue, mesentery, microvasculature and, G549  
   exchange, nasal heat and (seal), R883  
   flow: *see* Flow  
   intake  
     blood volume and plasma sodium after, R15  
     glucagon and cholecystokinin inhibition of, R719  
     restrictive feeding, R46

intercellular space, microdialysis method, E228  
 lung, extravascular, changes after coagulation, H634  
 permeability: *see* Permeability  
 transport  
   renal medulla, central core model, F382  
   vasopressin effects, inner medullary collecting duct, F823  
 Waveforms, symmetrical defibrillator, cardiac cell excitation and (chick), H1418  
 Waves  
   arterial travel, primate model for (baboon), H299  
   isovolumic pressure, quantitative comparison of left and right ventricular, H475  
 Weaning  
   insulin resistance during, E142  
   premature, S14 role in hepatic lipogenesis, E536  
 Weanling  
   gastrically administered prostaglandins, intact biliary excretion of, G787  
   gastrointestinal absorption, epidermal growth factor, G68  
 Weight  
   body  
     dietary calcium and, model, R501  
     gain and loss, adipocyte hyperplasia and (dormouse), R580

pregnancy and (hamster), R314  
 WI-38 cells, sodium-hydrogen exchange, mitogen stimulation of, C219  
 Wick-in-needle  
   interstitial fluid pressure measurement, H283  
   volume/pressure relations, skin and muscle interstitium, H291  
 Work, oxygen consumption and, muscle (frog, rat), C22  
 Wrist, occlusion, brachial artery changes and, hypertensive men, H217

## X

Xanthine dehydrogenase, liver function assessment, model, R352  
 Xanthine oxidase  
   detection, heart, H709  
   liver function assessment, model, R352

## Y

Yohimbine  
   coronary autoregulation and, H365  
   vasopressin secretion and, newborn (pig), R489

## Z

Zymogen granules, acidity, pancreatic protein secretion and, G711  
 Zymogens, pancreatic, intracellular transport, G517

# Author Index to Volume 253
